MOBOTIX Expands Management Team

June 11, 2018

Langmeil, Germany, 11. June 2018. MOBOTIX is expanding its management team to include two new members. Following a successful restructuring, MOBOTIX is paving the way for sustainable growth with its new members, both experienced industry experts: Christiane Kampling will now serve as Head of Marketing & Corporate Communications and Hartmut Sprave as Chief Technical Officer. Both started with the company on June 1, 2018.

Christiane Kampling is taking over as Head of Marketing and Corporate Communications at MOBOTIX. She has held similar positions over the past few years at Covestro, Xchanging Continental Europe, and ING Investment Management. Kampling was also able to gather valuable insights as Marketing Director at Dell. In these positions, Kampling, who holds a degree in business, was responsible for business opportunities and implementing entire marketing strategies (B2B and B2C). She was also in charge of developing new go-to-market models for SMEs and end users as well as building business opportunities through strategic partnerships and cooperations. In addition, Kampling managed the media, PR, and advertising agencies as well as events and roadshows.

As member of the Management Board and new Chief Technical Officer of the Technology Department, Hartmut Sprave is responsible for Hardware, Software, Product Management, Quality Management and Strategic Innovation at MOBOTIX. Sprave, who holds a degree in physics, previously served as Vice President Software at Loewe Technologies GmbH where he was responsible for software development at numerous sites in Germany and abroad. As co-founder and CTO of MacroSystem Digital Video GmbH, he gained extensive experience in the area of digital video technology.

"Christiane Kampling and Hartmut Sprave are both highly qualified experts, and we are pleased to welcome them to the MOBOTIX team," says Thomas Lausten, Chief Executive Officer at MOBOTIX. "With our strong new Management Team, we are perfectly prepared for any upcoming challenge."

About MOBOTIX

All over the world sites are protected by using MOBOTIX IP video technology. It delivers absolute reliability even in the most challenging conditions. From Oil Rigs in the North Sea, to World Heritage Sites in remote deserts, whether it is helping scientists at an Arctic research centre or greeting climbers at the top of Mount Everest; MOBOTIX equipment is designed with no moving parts to provide the best overall return on investment. An extended operating lifetime is guaranteed and further enhanced by continual software upgrades.
