

MOBOTIX to Showcase IoT Innovations at ISC West 2019

April 03, 2019

NEW YORK, New York, April 3, 2019 – MOBOTIX, the leading manufacturer of premium-quality secure IP video systems, will showcase its award-winning lineup of smart IoT devices for a range of vertical applications at ISC West 2019 from April 9-12 at the Sands Expo and Convention Center in Las Vegas (booth #16089). MOBOTIX solutions are quality engineered for high-performance and reliability with a multi-layer approach to cybersecurity safeguards. Attendees will also be able to meet with key members of the MOBOTIX leadership team, including MOBOTIX CEO and security industry veteran Thomas Lausten.

MOBOTIX will highlight its Programmable Logic Devices (PLDs) in a unique IoT wall booth design. The IoT Wall will showcase pre-programmed cameras alongside peripherals, such as lightbulbs, fans and switches, for automation demonstrations. These intelligent IoT devices reach beyond security to create more efficient operations for businesses in many verticals, from predictive maintenance in industrial applications to data-based merchandising strategy in retail. Similarly, MOBOTIX will be hosting in-booth presentations covering a wide variety of topics. For more information, visit <https://www.mobotix.com/en/iscwest/presentationschedule>.

MOBOTIX will also display its [T26 Outdoor Station and Access Module](#) for education campuses, which is a high-resolution hemispheric IP video door station with emergency-duress functionality allowing for keyless entry to secured buildings. MOBOTIX will also showcase the [MOBOTIX MOVE](#) line, featuring enhanced infrared technology and a pan-tilt-zoom functionality, and its [thermal imaging](#) line in which the M16 thermal camera won an SIA New Product Showcase Award last year. Both product lines are embedded with MOBOTIX's layered cybersecurity protocols and support ONVIF standards to enable seamless integration into third-party systems.

"This year at ISC West, MOBOTIX will be focusing heavily on our intelligent IoT solutions. We are looking to educate integrators and end users on Programmable Logic Devices, or PLDs, to highlight the endless customizable solutions we offer to our customers," said Joseph Byron, Vice President: Americas MOBOTIX. "All of MOBOTIX's products are quality engineered in Germany, with outstanding performance capabilities that reach far beyond simple security and surveillance applications to provide enhanced value and business intelligence for customers."

The MOBOTIX booth will also include notable solutions from technology partners Konica Minolta, Valen Energy, Wavestore, SAFR by Real networks, IPSOTEK, Genetec, and MxMSP by IP TechView.

All MOBOTIX solutions are manufactured and hand-tested in Germany, featuring low failure rates and exceeding product warranty standards.

About MOBOTIX AG

MOBOTIX is a leading manufacturer of premium-quality, intelligent IP video systems and sets standards for innovative camera technologies and decentralized security solutions with the highest level of cybersecurity. MOBOTIX was founded in 1999 and is based in Langmeil, Germany. MOBOTIX has an in-house research and development department, an in-house production facility in Germany and operates distribution companies in New York, Dubai, Sydney, Paris and Madrid. Customers worldwide trust in the durability and reliability of MOBOTIX hardware and software. The flexibility, built-in intelligence and unparalleled data security of the company's solutions are appreciated in many industries. MOBOTIX products and solutions help customers in industries such as industrial manufacturing, retail, logistics and healthcare. With strong and international technology partnerships, the company will continue to expand its universal platform and develop new applications in the future.
