MOBOTIX 7 Series Cameras Successfully Pass U.S. NEMA 4X Tests For Robustness and Reliability

July 31, 2023

MOBOTIX announces that their MOBOTIX 7 cameras have passed US NEMA 4X tests. This certifies that MOBOTIX 7 Series is rated for use in harsh environments. The U.S. National Electrical Manufacturers Association (NEMA) 4X is one of the highest ratings for outdoor equipment. The MOBOTIX 7 Series cameras meet all criteria set forth by NEMA 4X standards and are designed to withstand dust, water spray, snow, ice, and extreme temperatures without compromising performance or reliability.

"We are proud of our MOBOTIX 7 cameras passing these tests with such success," says CTO Christian Cabirol. "This once again proves that our cameras are capable of handling even the toughest environmental conditions."

The MOBOTIX 7 Series cameras have been tested extensively for shock resistance and resistance against vibration and corrosion. All tests are conducted according to strict industry standards to ensure the product meets the highest quality requirements for indoor and outdoor applications.

"At MOBOTIX, we strive to provide our customers with products that meet their highest expectations," says Cabirol. "We believe this certification demonstrates our commitment to providing reliable products that can handle any situation."

Successfully passing these tests is another proof of Made in Germany's premium quality. In addition to the physical quality tests, the MOBOTIX cameras are regularly tested for cyber security. In penetration tests conducted by renowned testing institutes, the cameras repeatedly prove their resistance to cyber-attacks. Customers can be sure that when they purchase MOBOTIX cameras, they get high-end video technology with exceptional durability and quality.

"The successful NEMA 4X tests confirm our high demand for the best quality. We offer our customers video systems and solutions that provide the best possible protection - not only for people, equipment, goods, premises or buildings but also for the data that our cameras collect," emphasizes MOBOTIX CSMO Phil Antoniou who is responsible for Sales Americas.

"With their robustness, the cameras are particularly suitable for demanding environments, such as in industry & production, energy, utilities, and mining, or in outdoor areas around logistics and in traffic

monitoring. The long durability reduces the need for maintenance, saving time and money. This means profitable performance with the best return on Invest", concludes Phil Antoniou.

About MOBOTIX AG

MOBOTIX is a leading manufacturer of intelligent IP video systems in premium quality and sets standards in innovative camera technologies and decentralized security solutions with the highest level of cyber security. MOBOTIX was founded in 1999 and is headquartered in Langmeil, Germany. The company relies on its own research and development as well as its own production "Made in Germany". Customers around the world trust in the durability and reliability of MOBOTIX hardware and software. The flexibility of the solutions, the integrated intelligence and the highest level of data security are appreciated in many industries. MOBOTIX products and solutions support customers in areas such as industrial manufacturing, retail, logistics and healthcare. With strong and international technology partnerships, the company is using artificial intelligence and deep learning modules to expand its universal platform and new applications in a wide range of sectors.
