

MOBOTIX S16 Thermal TR Wins First Place at the 2018 PROTECTOR Awards

el 28 de junio de 2018

Langmeil, Germany, June 28. Having won a Gold PROTECTOR Award with the MOBOTIX M16 in 2017, another MOBOTIX camera has made it to the winner's podium this year. MOBOTIX has once more won first place in the Video Surveillance category with the S16 Thermal TR camera at this year's SicherheitsExpo in Munich, Germany, and thus stood its ground against a multitude of renowned security solutions. The results of this prestigious award, came as the result of a vote by readers of the trade journal PROTECTOR & WIK and users of the sicherheit.info online portal.

"We are delighted to have received the Gold Protector Award and wish to thank all the knowledgeable readers out there who voted for us," says Jan Sanders, Vice President Sales Europe at MOBOTIX AG. "Together with our partners, we have been able to offer extremely flexible solutions in the area of video security and much more thanks to our Mx6 system platform, on which the S16 Thermal TR is also based. Different combinations of thermal and/or optical technologies can be combined with the MOBOTIX S16 Thermal TR. Alongside its compact size and sensor modules, which can be offset by up to 3 m, this means

that we can tap into new, much sought-after applications in areas such as early fire detection and monitoring, as well as in the optimization of critical production processes related to Industry 4.0, on top of standard applications. We have created a totally new, multifaceted approach for client-specific solutions with the greatest added value and a rapid ROI thanks to the thermal information produced by every pixel of every image, unique interoperability of the decentralized MOBOTIX system architecture (IoT), degree of robustness and reliability offered by a product "Made in Germany" and our Cactus Concept, which ensures the best possible protection against cyberattacks. Receiving this outstanding award is a sign that we're on the right track and it serves as an incentive to continue putting a strong focus on developing innovative products that can flexibly meet the most challenging customer requirements in a diverse range of solutions."

This year's ceremony marks the sixth time that the trade journal PROTECTOR & WIK and the sicherheit.info online portal present an award for security technology. The three best products in each of the four categories of Video Surveillance, Access Control, Alarm Technologies and Smart Home Security were awarded a gold, silver and bronze PROTECTOR in each category.
