MOBOTIX ONE - Detektor Innovative Achievement Award Win

MOBOTIX honored with the “Innovative Achievement” in the Video Surveillance category at the 2024 Detektor International Awards

el 23 de octubre de 2024

MOBOTIX was honored with the “Innovative Achievement” award in the Video Surveillance at this year's Detektor International Awards in Stockholm. The company received the award for its advanced camera solution MOBOTIX ONE. The award was accepted by Anders Kjellberg, Regional Sales Manager Nordics/Baltics of MOBOTIX AG at the ceremony of Skydd, Scandinavia's largest security exhibition, at Stockholmsmässan.

The Detektor International Awards, established in 2000, are among the most prestigious awards in the Scandinavian security industry. The award recognizes innovative solutions that are characterized by outstanding technological advances and significant customer benefits.

The MOBOTIX ONE M1A impressed the jury with its advanced technology and versatility. The award-winning camera is characterized in particular by its modular functions and the integration of AI technologies, which enable tailor-made solutions for a wide range of surveillance requirements.

The award winners are selected independently by Detektor's editorial team, which identifies and evaluates innovative products from across the industry. The award comprises four categories: Alarm & Detection Systems, ID & Access Control, Video Surveillance and IoT & Security Solutions.

“We at MOBOTIX are very proud to make an important contribution to the innovation of video technology with the MOBOTIX ONE. A solution that effortlessly combines the decentralized MOBOTIX world with AI trends in video security. A cyber-secure and NDAA-compliant system that combines security and robustness with flexibility and intelligence. We are delighted to receive this award,” says Kjellberg.
