Change of the revenue and EBIT forecast for the financial year 2015/16

el 07 de julio de 2016

The revenue and EBIT forecast of the financial year 2015/16 given in the interim group management report of the first half year (October 1, 2015 - March 31, 2016) can not be maintained anymore after taking into account project delays in different regions outside of Europe and the unrealized OEM-revenue.

Based on the preliminary figures of the third quarter just finished on June 30, 2016 the maximum expectation of the management is a balanced result as per the financial year 2015/16, taking into account different special effects.
