

MOBOTIX at Security 2018: Focus on new products and partner solutions

le 16 août 2018

Langmeil, Germany, 16 August 2018. During this years international Essen Security trade fair, MOBOTIX will showcase their innovative solutions in line with "Secure your business," the motto of Essen Security. This international trade fair for security and fire prevention is being held in Essen Germany, from 25 to 28 September 2018. MOBOTIX will provide an outlook of the latest hardware and software developments that will be available this year. The company will be in Hall 7, Booth 7B33, as MOBOTIX will be shining a spotlight on highly efficient partner solutions.

MOBOTIX will unveil their new MOBOTIX MOVE series with four camera models during the Essen Security event. Two PTZ SpeedDome cameras, a Bullet camera and a VandalDome camera will complement the current Mx6 Premium camera range, offering MOBOTIX customers even greater flexibility. These weatherproof, high-quality IP cameras meet the requirements of ONVIF Profiles S and G and are equipped with the latest standard functions of centralized video systems, such as a day/night function with an IR blocking filter and integrated infrared LED illumination, Wide Dynamic Range, Vario lens and High Speed PTZ.

With the aid of selected industry solutions, MOBOTIX will also show how thermal imaging systems can optimize and secure production processes and therefore contribute to increased efficiency and safeguard processes within companies. How a modern POS cash register system solution can reduce sales transaction losses while enhancing customer satisfaction and offering better transparency in transactions, for example. MOBOTIX's new, even more customer-oriented approach, can also be seen in the joint solutions MOBOTIX developed with their technology partners. Genetec, Ipsotek, Konica Minolta and Nexcom are in attendance at the booth along with MOBOTIX partners like Encom, IBC, ITES, Peter Communication, Schirra IT, SEDI,

TecTrade, Uniserve and VALEO IT.

On top of existing technologies and the many cutting-edge innovations that MOBOTIX are exclusively presenting at Essen Security, the issue of cybersecurity is another important topic at the trade fair. MOBOTIX developed the unique Cactus Concept for the reliable and complete protection of end-to-end video systems against cyberattacks. MOBOTIX will demonstrate how to set up a more resilient and secure environment using proven methods, as well as why MOBOTIX video systems are among the most secure products of their kind in the world.

About MOBOTIX

All over the world sites are protected by using MOBOTIX IP video technology. It delivers absolute reliability even in the most challenging conditions. From Oil Rigs in the North Sea, to World Heritage Sites in remote deserts, whether it is helping scientists at an Arctic research centre or greeting climbers at the top of Mount Everest; MOBOTIX equipment is designed for durability to provide the best overall return on investment. An extended operating lifetime is guaranteed and further enhanced by continual software upgrades.
