

## All MOBOTIX camera models and the video management system MxManagementCenter are conform to ONVIF standards

**14 giugno 2019**

In addition to all current IoT and MOVE cameras from MOBOTIX, the video management system MxManagementCenter is now also ONVIF-compliant (Profile S, Version 2.0 or higher) and can therefore also integrate ONVIF cameras from third-party vendors. This makes MOBOTIX partners and customers much more flexible and efficient when planning new security solutions and expanding existing MOBOTIX systems. The ONVIF integration also allows MOBOTIX users to integrate their solutions fully with other ONVIF compatible systems e.g. access control, Video Management Systems etc.

ONVIF ([www.onvif.org](http://www.onvif.org)) stands for Open Network Video Interface Forum and is a worldwide open standard for IP-based security products such as surveillance cameras. "ONVIF compatibility enables MOBOTIX partners and customers to implement security solutions from individually combined components, such as cameras, recording devices, accessories or video management software", explains MOBOTIX CEO Thomas Lausten.

ONVIF compliance also enables new functions. The Mx6 camera platform can now be used to generate an H.264 stream in addition to the MxPEG and MJPEG video codecs. "This allows us to participate in tenders where H.264 or ONVIF-S is mandatory, which significantly expands the market potential of MOBOTIX," says Lausten.

**About MOBOTIX AG**

MOBOTIX is a leading manufacturer of intelligent IP video systems in premium quality and sets standards in innovative camera technologies and decentralized security solutions with the highest level of cyber security. MOBOTIX was founded in 1999 and is headquartered in Langmeil, Germany. The company relies on its own research and development as well as its own production "Made in Germany". Customers around the world trust in the durability and reliability of MOBOTIX hardware and software. The flexibility of the solutions, the integrated intelligence and the highest level of data security are appreciated in many industries. MOBOTIX products and solutions support customers in areas such as industrial manufacturing, retail, logistics and healthcare. With strong and international technology partnerships, the company is using artificial intelligence and deep learning modules to expand its universal platform and new applications in a wide range of sectors.
