

MOBOTIX AG: Completion of Agreement on Corporate Restructuring to Safeguard Competitiveness and Forecast for the 2025/26 Fiscal Year

24 ottobre 2025

The Management Board, Supervisory Board and Works Council have adopted a comprehensive package of measures to safeguard the competitiveness of MOBOTIX AG. This package includes an adjustment of the product strategy focusing on core competencies such as thermal camera technology and the VAXTOR optical character recognition/evaluation technology (OCR), in particular the expansion of AI-based image analysis, as well as an adjustment of the organizational structure, which involves a reduction in the workforce.

The measures will result in planned cost savings of EUR 6.0 million in personnel and material expenses.

The planned restructuring costs of EUR 2.1 million mainly relate to expenses for a transfer company for departing employees. Both the cost savings and the restructuring costs are expected to lead to a revenue target of EUR 49.0 million and a planned break-even EBIT in the current 2025/26 fiscal year.

For the fiscal year ended September 30, 2025, the forecast of June 30, 2025, with revenues of EUR 51.0 to 53.0 million and an EBIT of EUR -1.5 to -2.0 million, is confirmed.
