MOBOTIX

Certified security against cyber attacks

Mx6 cameras with renewed SySS certificate

24 января 2020

Cyber security is one of the central development focuses for MOBOTIX. The MOBOTIX Cactus Concept stands for an end-to-end video system that is reliable and fully protected against hacking attacks. We are pleased to announce that in December 2019, the IT security of the Mx6 series with its current firmware has also been successfully tested by SySS GmbH, the market leader for penetration tests in Germany.

In several scenarios, the hardware and software components were subjected to simulated hacker attacks. These recent tests as well as continuous in the future will further enhance our industry-leading cyber-security standards.
