</tbody>
</table>

---

### Preparing the Camera

1. **Remove the back cover (only c25 model only)** if the camera has not been mounted already. Open the camera back cover before proceeding.

2. **Exchange the screws** as follows for plastic safety glasses for the front lens by using a small flat-headed screwdriver:

   - Place the supplied safety glasses on the red dot of the front lens and not from the rear, you should now easily be able to remove it.
   - The red clip from its seating on one side. The clips can now be removed easily.

### Installing the On-Wall Mounting Set

#### Prepare the installation of the on-wall set

1. **Exchange the cable fittings (optional)**
   - Before proceeding.

2. **Prepare the Inlet boss boards (optional)**
   - Center the camera so that it is positioned in the direction of the viewing direction.
   - Place the camera lens so that the red dot (item 2.1) is positioned in the direction of the viewing direction.
   - Attach the camera lens to the camera using cable ties (item 1.18, see figure).

3. **Mount the mounting ring**
   - Using the bolt set (item 1.12) and the Torx wrench TX6 (item 1.11), turn the camera so that it points into the proper direction.
   - Insert the lens of a p25.

4. **Establish the power supply to the camera**
   - Using the supplied cable (item 1.14) and the Torx wrench TX6 (item 1.11), turn the camera so that it points into the proper direction.
   - Insert the lens of a p25.

Removing the Camera

1. Turn the camera to the mark
   Turn the camera until the two LEDs of a c25 are perpendicular to the mark above the installation mark (highlighted red in the figure). When using a p25, turn the camera until the lens points into that direction.

2. Firmly press down
   Place two thumbs at the positions indicated by the red circles in the figure, then firmly press the camera into the on-wall socket. The camera tilts inwards and the opposite side comes up.

3. Pull out the camera
   You can now remove the camera from the On-Wall Mounting Set. Remove the network cable and any other cables or wires attached to the camera.

Technical Specifications

Safeguards

- This product must not be used in locations exposed to the dangers of explosion.
- The On-Wall Mounting Set is only to be used in combination with the MOBOTIX cameras of the c2x and p2x series.
- Make sure that you install the product as outlined in the installation instructions of these boxes.
- Electrical systems and equipment may only be installed, modified and maintained by a qualified electrician or under the direction and supervision of a qualified electrician in accordance with the applicable electrical guidelines. Make sure to properly set up all electrical connections.
- Only install this product in or on suitable, solid materials that provide for a sturdy installation of the fixing elements used.
- When using an MOBOTIX interface box (e.g., MX-Input-Box, MX-Output-Box), the installation instructions of these boxes are also to be followed.
- For the On-Wall Mounting Set, the same operating conditions apply as for the installed MOBOTIX camera.

Removing the Camera

1. Turn the camera to the mark
   Turn the camera until the two LEDs of a c25 are perpendicular to the mark above the installation mark (highlighted red in the figure). When using a p25, turn the camera until the lens points into that direction.

2. Firmly press down
