

Quick Guide – MOBOTIX NAS & MOVE/ONVIF Cameras

Setting up MOBOTIX NAS/MxManagementCenter Using **MOVE/ONVIF** Cameras

Setting up MOBOTIX NAS & MOVE/ONVIF Cameras

Quick Guide – MOBOTIX NAS & Device Finder
www.mobotix.com

MxManagementCenter Tutorial
www.mobotix.com

1 MxManagementCenter

- Download and install MxManagementCenter (www.mobotix.com)
- Start MxManagementCenter
- Add MOBOTIX MOVE/ONVIF cameras
- Check integration key

2 Device Finder

- Download and install Device Finder (www.mobotix.com)
- Start Device Finder
- Identify device
- Update firmware (if required)
- Configure Basic Settings

4 MxManagementCenter

- Assign recording paths
- Assign cameras to recording paths

3 NAS Web Interface

- Install apps
 - Container Station
 - QVR Pro (Recording App)
- QVR Pro
 - Configure recording space
 - Add cameras (MOVE/ONVIF only)

This document is valid for the following MOBOTIX NAS models

Product Name	Item Number	Product Label
MOBOTIX NAS 2-Bay/8 Channels	Mx-S-NAS2a-8	251-G
MOBOTIX NAS 4-Bay/16 Channels	Mx-S-NAS4A-16	451-G
MOBOTIX NAS 8-Bay/32 Channels	Mx-S-NAS8A-32	873U-G

Minimum requirements for software versions

- MOBOTIX NAS: Mx-NAS2-4A-4.3.4.0807, Mx-NAS8A-4.3.4.0807, ContainerStation 1.8.3.207, QVRProServer 1.2.1.0 (see MOBOTIX NAS Quick Install)
- MOBOTIX MOVE: SD1A → MB20181025RS, BC1A/VD1A → MB20181025RP
- MxManagementCenter: 2.0.1+

IMPORTANT: We recommend updating all system components to the latest software releases. Please download the latest releases of MxMC, MOBOTIX NAS, and MOBOTIX MOVE cameras from the MOBOTIX website www.mobotix.com:

- Support > Download Center > Software Downloads

Video Tutorials are available from the MOBOTIX website www.mobotix.com:

- Support > Download Center > Documentation > Video Tutorials

The **MOBOTIX NAS HDD Compatibility List** is available from the MOBOTIX website www.mobotix.com:

- Support > Download Center > Documentation > White Lists

A Note on Licensing

MxManagementCenter can show MOBOTIX IoT and MOVE cameras “as is”, i.e., without any further licensing. For bandwidth-optimized usage and professional applications, it is highly recommended to use **H.264** (requires a license for MxManagementCenter).

For more information on licensing models, please read the **Compact Guide MxMC 2.0** from the MOBOTIX website www.mobotix.com:

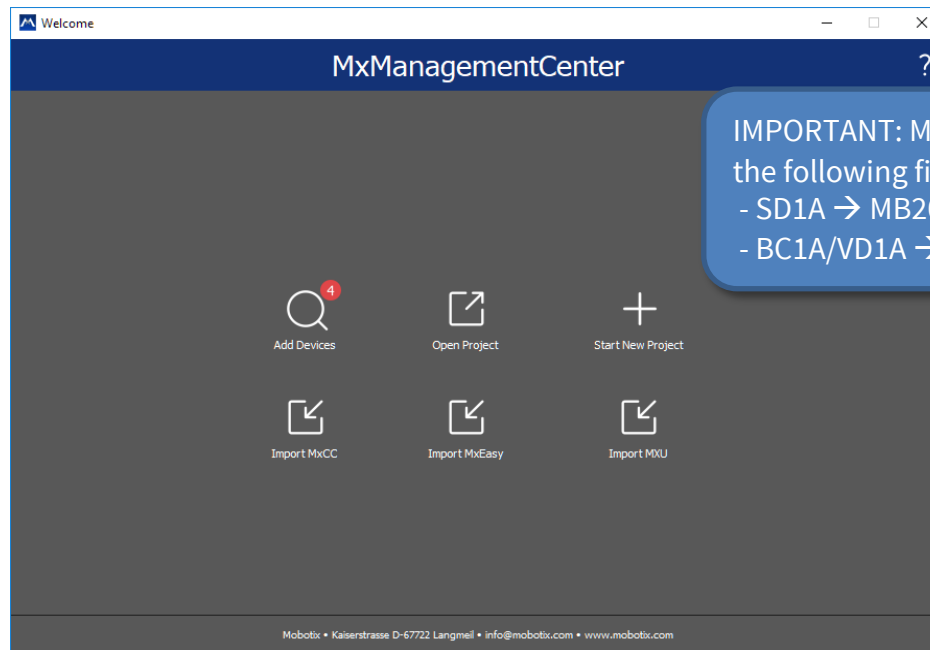

- Support > Download Center > Documentation > Brochures & Guides
- Only one Starter License per MxMC required to enable H.264

A Note on Password Security

- The default user of the NAS is “**admin**” and the **password** is “**admin**”.
- **NEVER use the default access privileges!** Always make sure that you have changed the default passwords to strong passwords (numbers, lower/upper case letters, special characters)!

1. Start **MxManagementCenter**.
2. Start the **Welcome Wizard** by clicking on **File > Welcome** in the menu bar.

3. Click on **Add Devices**. Then select the desired ONVIF S-compliant cameras you'd like to add to MxMC.
Note: It can take up to ten minutes to find an ONVIF camera. As an alternative, you can manually add the cameras to the list by clicking the “+” icon in the control bar.
4. Enter the access privileges. You need access privileges of a user with ONVIF administration level access. For MOBOTIX MOVE cameras, the admin user in the camera's web interface is also the ONVIF admin. For other camera brands (e.g., Axis), the roles for web interface admin and ONVIF admin are separate.

Step 2 – Adjust the Image Settings for Live and Recording

Configuration - MOBOTIX MOVE

Camera Configuration

Name: MOVE-10.192.0.67

Connection Protocol: MOBOTIX MOVE

Image Quality:

Create MxProfiles

Integration Key: bb9a3442-3a4e-459a-9039-7a6e6b1f54c6

Callout 1: Open lock icon to enter edit mode, then...

1. Right-click one or more selected **MOVE/ONVIF** cameras.
2. Open **Connection Settings**.
3. Select your image and codec settings.

A Note on Image & Codec Settings:

- MxMC defines the settings for **Live** and **Recording**.
- The HiRes profile **MxHiQuality** belongs to the **Recording** settings of the NAS.
- **H.264** Codec requires a **Starter License** for MxManagementCenter.

The screenshot displays the 'Camera Configuration' window for a device named 'MOVE-10.192.0.67'. The 'Connection Protocol' is set to 'MOBOTIX MOVE'. The 'Connection Settings' tab is active, showing various video and bandwidth parameters. At the bottom of the configuration panel, the 'Integration Key' is displayed as 'bb9a3442-3a4e-459a-9039-7a6e6b1f54c6', which is highlighted with a red rectangular border. A blue callout box with a white border is overlaid on the right side of the interface, containing text and a list of instructions. A blue arrow points from the callout box to the integration key field.

Integration Key: bb9a3442-3a4e-459a-9039-7a6e6b1f54c6

A note on the Integration Key

- The key will be automatically set while adding the camera.
- The key is required for adding the camera in the MOBOTIX NAS.

If the integration key is **not shown below**, please try the follow steps:

- Remove camera from the system and add it again!
- Reset the camera to factory defaults and add the camera again.
- Check if the cameras is officially registered as an ONVIF S client at <https://www.onvif.org/conformant-products/>
 - Make sure model is conforming (using exact model name).
 - Check if the camera firmware release is conforming.

Step 5 – Update MOBOTIX NAS Firmware (If Required)

The screenshot shows the Finder Pro 2.6.0 application window. At the top, there are navigation buttons: Login, Network Drives, Configuration, Details, and Bookmark the device. Below these is a table of NAS devices. The table has columns for Bookmark, Name, IP Address, Type, Server Type, Version, MAC Address, and Status. One device is listed: 2BAyNas, with IP Address 10.100.100.100, Type NAS-251+-G, and Version 4.3.4.0807mx. A blue callout box points to the IP address with the text "NAS IP Address (remember!)". Another blue callout box points to the Version column with the text "Only if a new release is available!". Below the table, the macOS menu bar is visible, with the 'Tools' menu open. The 'Tools' menu contains: Sleep, Restart Server, Shut down Server, Remote Wake Up (Wake on LAN), and Update Firmware. The 'Update Firmware' option is highlighted with a red box. In the bottom left corner, there is a purple callout box with an icon of an open book and the text "Quick Guide – MOBOTIX NAS & Device Finder".

Bookmark	Name	IP Address	Type	Server Type	Version	MAC Address	Status
	2BAyNas	10.100.100.100		NAS-251+-G	4.3.4.0807mx	24-5E-BE-22-5A-D7

Quick Guide – MOBOTIX NAS & Device Finder

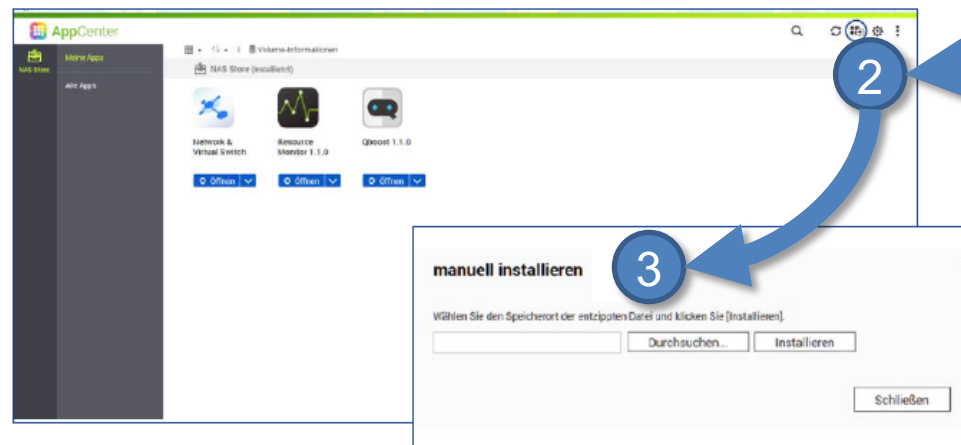

Installation der Recorder-Software / Installation of the Recorder Software / Installation du logiciel d'enregistrement

1. Open **AppCenter**.
2. Click on the **Install Manually** icon.
3. Manually install these apps:
 - **Container Station App**.
 - **QVR Pro** software.

Installieren Sie zuerst die Container Station App und danach die QVR Pro Software.
Install the Container Station App software and then the QVR Pro software.
Installez d'abord Container Station App et après le logiciel QVR Pro.

- ⚠ HINWEIS:** Ein automatisches Update wird nicht unterstützt.
NOTE: The software does not support automatic updates!
REMARQUE: La mise à jour automatique n'est pas supportée.

1

1. Select **Recording Storage**.
2. Create **Recording Space**.

Note: Reserve extra **Recording Space** if you'd like to add MOBOTIX IoT cameras later on!

Recording Storage

 Recording Storage

Recording Space

Specify where to save recorded videos and how many days QVR Pro records normal and event streams.

Quick Guide – MOBOTIX
NAS & IoT Cameras

2 +

Available NAS storage: 129.00 GB

Note: To manage the storage space, go to [\[Storage Manager\]](#).

Set the required size for all recording spaces and leave the **Overwrite Threshold** at its default value (95 %).

Important Note: Wait until the recording space is fully allocated and **do not reboot the MOBOTIX NAS or add cameras before this task is finished!**

1. After the recording spaces have been completely allocated, open **Camera Settings** in QVR Pro (Recorder Software).
2. QVR Pro is only suitable for MOVE/ONVIF cameras. To use the full functionality of Premium MOBOTIX IoT cameras (such as SD card failover and MxPEG+), MxFFS with buffered archives must be used. Therefore, make sure that no MOBOTIX IoT cameras have been selected. You can recognize MOBOTIX IoT cameras by their MAC address. If MOBOTIX IoT cameras have also been selected, deselect them.

Add Camera

Camera Selection

The following table lists the cameras found in this NAS network. Select the camera(s) and click Next, or use the advanced search feature to find cameras on other networks. You can also use the filter feature to only display cameras of a specific brand and model. If the camera you want to add is not on the list, click Next to manually add the camera.

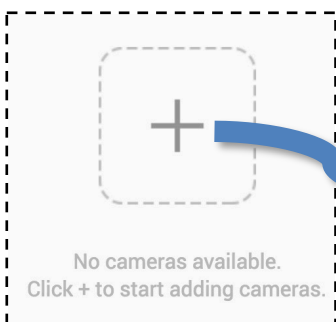

<input type="checkbox"/>	Brand	Model	IP Address	MAC Address
<input checked="" type="checkbox"/>	ONVIF	ONVIF ProfileS Cameras	10.192.0.173	00:03:c5:c0:00:ad
<input type="checkbox"/>	ONVIF	ONVIF ProfileS Cameras	10.24.0.22	00:03:c5:18:00:16
<input type="checkbox"/>	ONVIF	ONVIF ProfileS Cameras	10.22.176.26	00:03:c5:16:b0:1a
<input type="checkbox"/>	ONVIF	ONVIF ProfileS Cameras	10.22.10.71	00:03:c5:16:0a:47
<input type="checkbox"/>	ONVIF	ONVIF Cameras (Fixed Settings)	10.1.1.91	24:5E:BE:21:83:50
<input type="checkbox"/>	ONVIF	ONVIF ProfileS Cameras	10.22.5.108	00:03:c5:16:05:6c
<input type="checkbox"/>	ONVIF	ONVIF ProfileS Cameras	10.22.10.149	00:03:c5:16:0a:95

Cameras selected: 2, Cameras that can be selected: 14 ⓘ

Scanning 100%

Refresh

Step 1/4 Next

Important Note: Do not select any MOBOTIX IoT cameras!

Check the MAC address:

- MOBOTIX MOVE: 00:03:C5.C0.XX.XX
- MOBOTIX IoT: 00:03:C5.XX.XX.XX

3. In the next window, check whether MOBOTIX NAS has recognized the desired camera brand and IP address. Continue by adding any missing camera data, such as:
- **Name:** Enter a unique description (used in QVR Pro only).
 - **Account/Password:** Access data must correspond to an ONVIF admin user for ONVIF S cameras.

The screenshot shows the 'Add Camera' window with the following elements:

- 1:** A blue circle pointing to the 'Preview' column header in the table.
- 2:** A blue circle pointing to the 'Account' and 'Password' input fields.
- 3:** A blue circle pointing to the 'Test' button in the 'Action' column.

A blue callout box contains the following instructions:

1. Enter **Name** (unique description).
2. Enter **Account** and **Password**.
3. Click **Test** button for each camera.

Note: The **Preview** image will not appear in this step.

The table below shows the camera configuration:

Preview	Name	Brand	Model	IP Address	Port	RTSP Port	Account	Password	Action
<input type="checkbox"/>	<input type="text" value="ONVIF_ONVIF"/>	<input type="text" value="ONVIF"/>	<input type="text" value="ONVIF Pr"/>	<input type="text" value="10.1.6.14"/>	<input type="text" value="80"/>	<input type="text" value="554"/>	<input type="text"/>	<input type="text"/>	<input type="button" value="Test"/>

- Define the recording settings (normal = continuous recording, event recording = event controlled) in this step.

Note: When the camera is added, two profiles (MxHiQuality for HiRes and MxLoQuality for LoRes) are automatically created in MxMC. The values set in MxMC for MxHiQuality are automatically transferred to the MOBOTIX NAS.

Add Camera

Profile setting MxHiQuality

Recording Settings	Recording Streams
<input checked="" type="checkbox"/> Enable Recording	
<input checked="" type="checkbox"/> Normal Recording	<input checked="" type="checkbox"/> MxHiQuality
<input type="checkbox"/> Event Recording  	<input type="checkbox"/> MxHiQuality
<input type="checkbox"/> Enable audio recording on this camera	<input checked="" type="radio"/> Stream1

<input type="checkbox"/> Enable Autosnap 	

All Day  +  

All Day  +  

All Day  +  

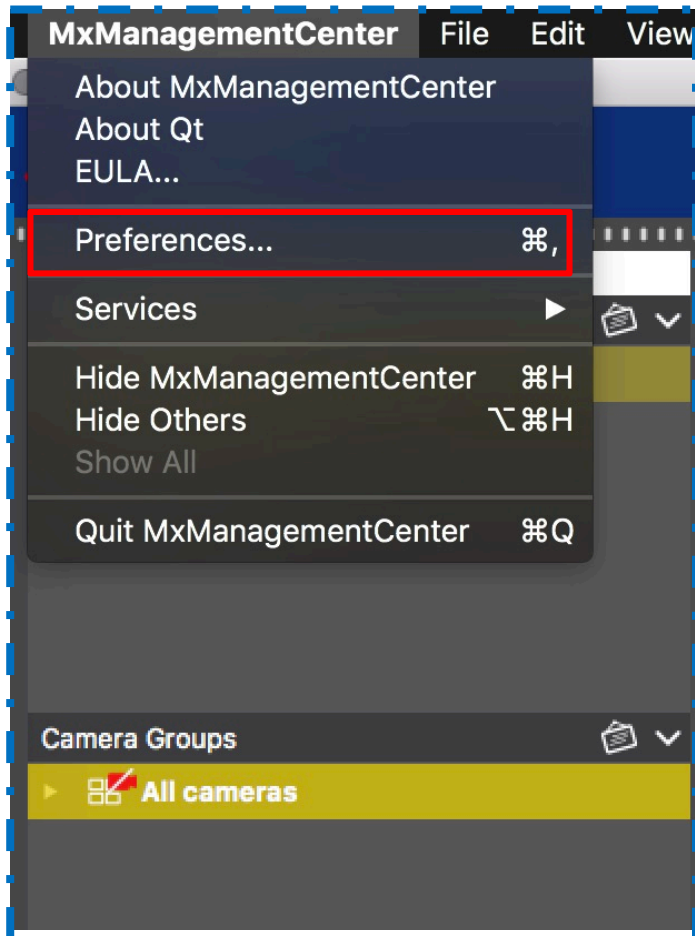

Note: Simultaneous operation of **Normal Recording** and **Event Recording** is currently not supported. It is recommended to use **Normal Recording** for PTZ cameras.

Cancel Step 3/4 Back Next

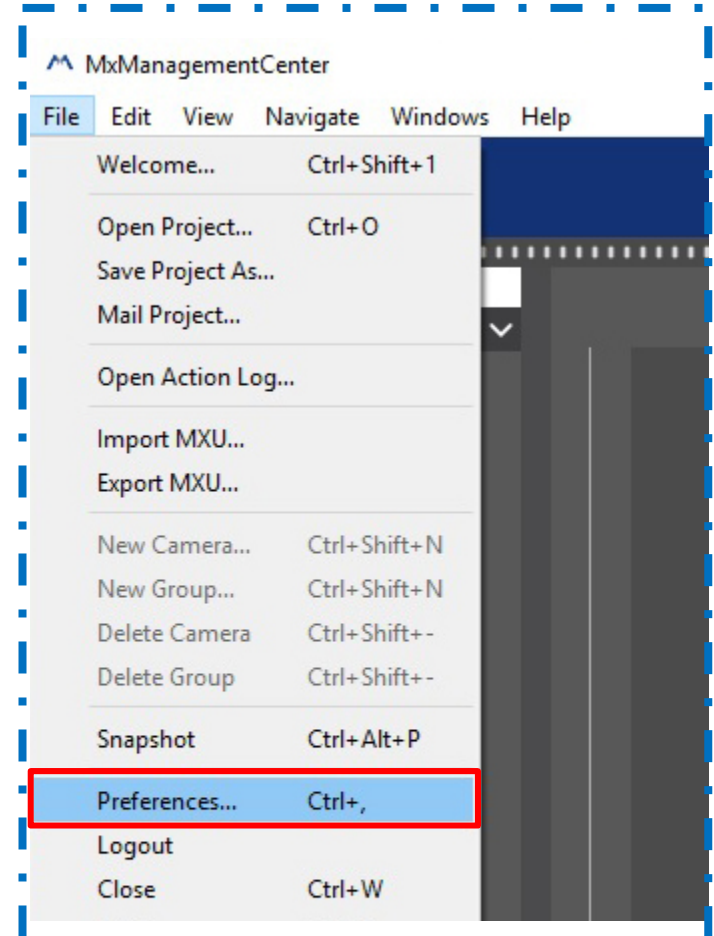

1. Finish and then close the wizard.
2. In the **Camera Settings** window, check that all cameras have been added to the QVR Pro software.
3. Wait some time (~5 min) until the MOBOTIX NAS has **connected to the new cameras**.

The screenshot shows the 'Camera Settings' window in QVR Pro software. The window title is 'Camera Settings' and it contains a header with 'Add', 'Edit', and 'Delete' buttons. Below the header, it displays 'Total channels:8 Used channels:1 Available channels:7'. The main content is a table with columns: Channel, Camera Name, Status, Recording Settings, Brand, Camera Model, Network Info, and Action. A blue arrow points from the 'Connecting' state to the 'Connected' state.

Channel	Camera Name	Status	Recording Settings	Brand	Camera Model	Network Info	Action
Channel 1	MxMove_Vandal	Connecting	Stream1: Recording stopped (No connection) Frame rate: 0, Bit rate: 0 bps	ONVIF	ONVIF ProfileS Cameras	Camera IP: 10.192.4... Network interface: Auto	[Edit] [Refresh] [Delete] [Share]
Channel 1	MxMove_Vandal	Connected	Stream1: Recording Frame rate: 20, Bit rate: 6.2 Mbps	ONVIF	ONVIF ProfileS Cameras	Camera IP: 10.192.0.67 Network interface: Auto	[Edit] [Refresh] [Delete] [Share]

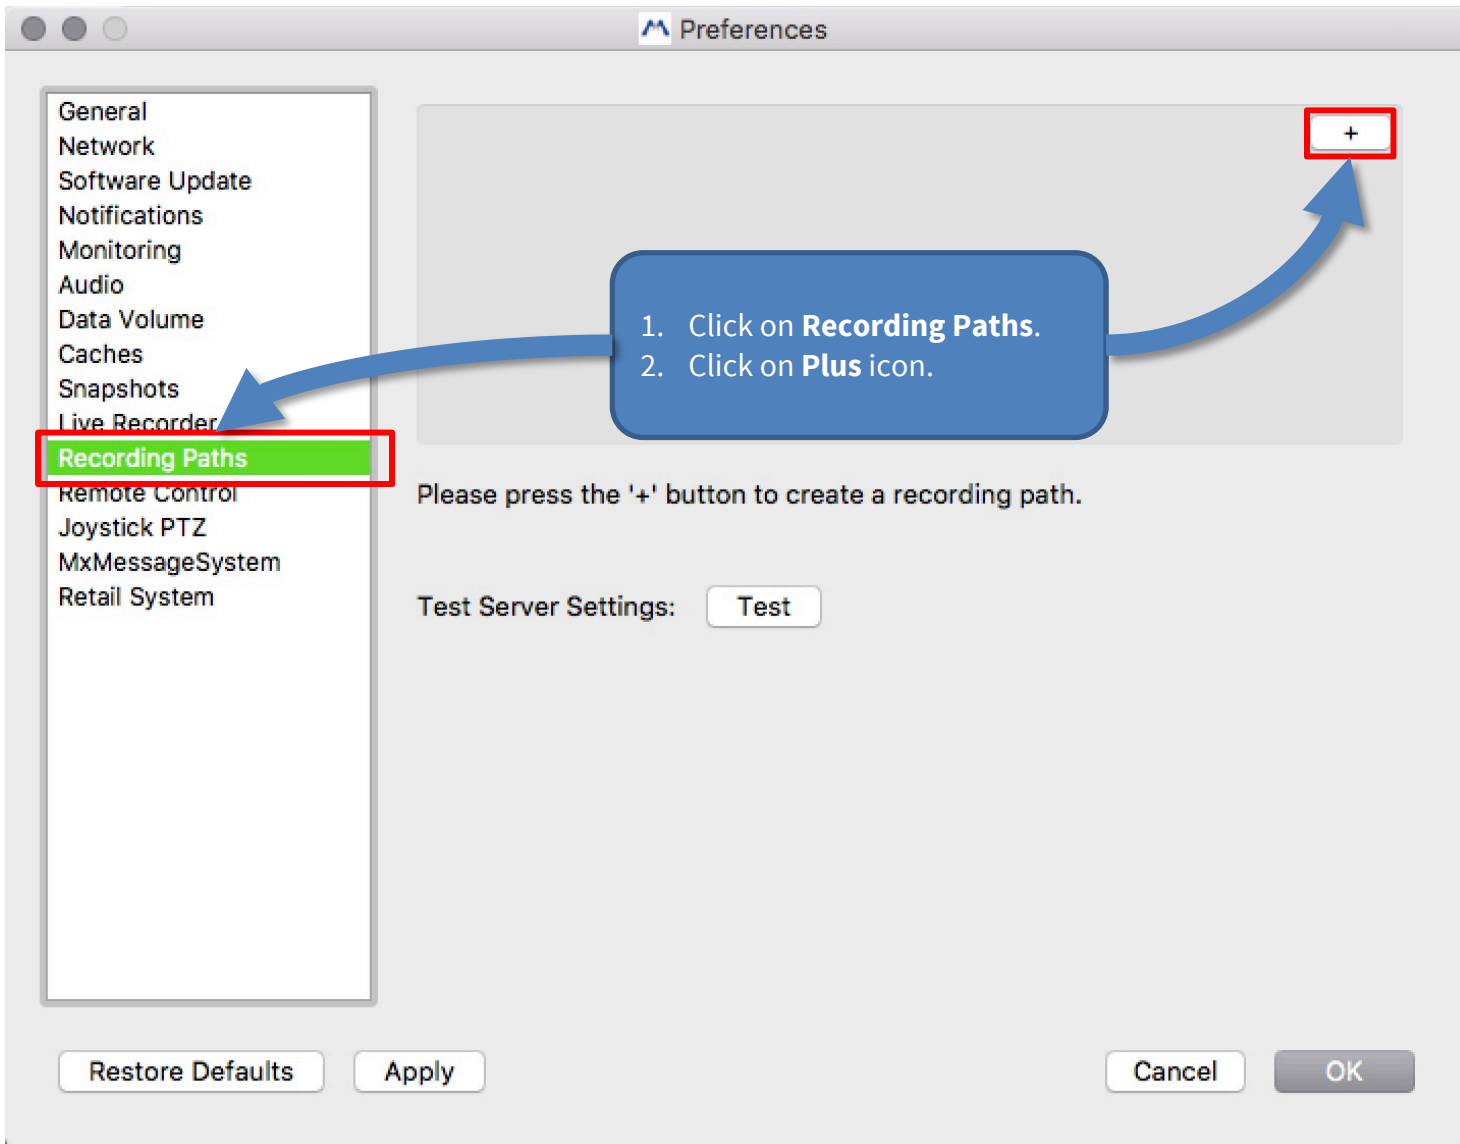

Apple Mac Version

Windows Version

The screenshot shows the MxManagementCenter interface with the 'Configuration - MOBOTIX MOVE' window open. The 'Preferences' tab is selected, and the 'MOBOTIX NAS' configuration section is active. A table on the left lists network drives, with '2BAyNas' at IP '10.100.100.100' highlighted. A blue callout box contains a 6-step instruction list. Numbered callouts (1-6) point to specific UI elements: 1. Type dropdown, 2. IP address field, 3. Username field, 4. Test button, 5. Apply button, and 6. OK button.

MOBOTIX NAS

Name: MOBOTIX NAS

Type: MOBOTIX NAS (ONVIF)

File Server: 10.100.100.100 Port: 8080 Use SSL

User Name: admin Password:

Test Server Settings: <http://10.0.0.254:8080> Test

Buttons: Restore Defaults, Apply, Cancel, OK

Bookmark	Name	IP Address
	2BAyNas	10.100.100.100

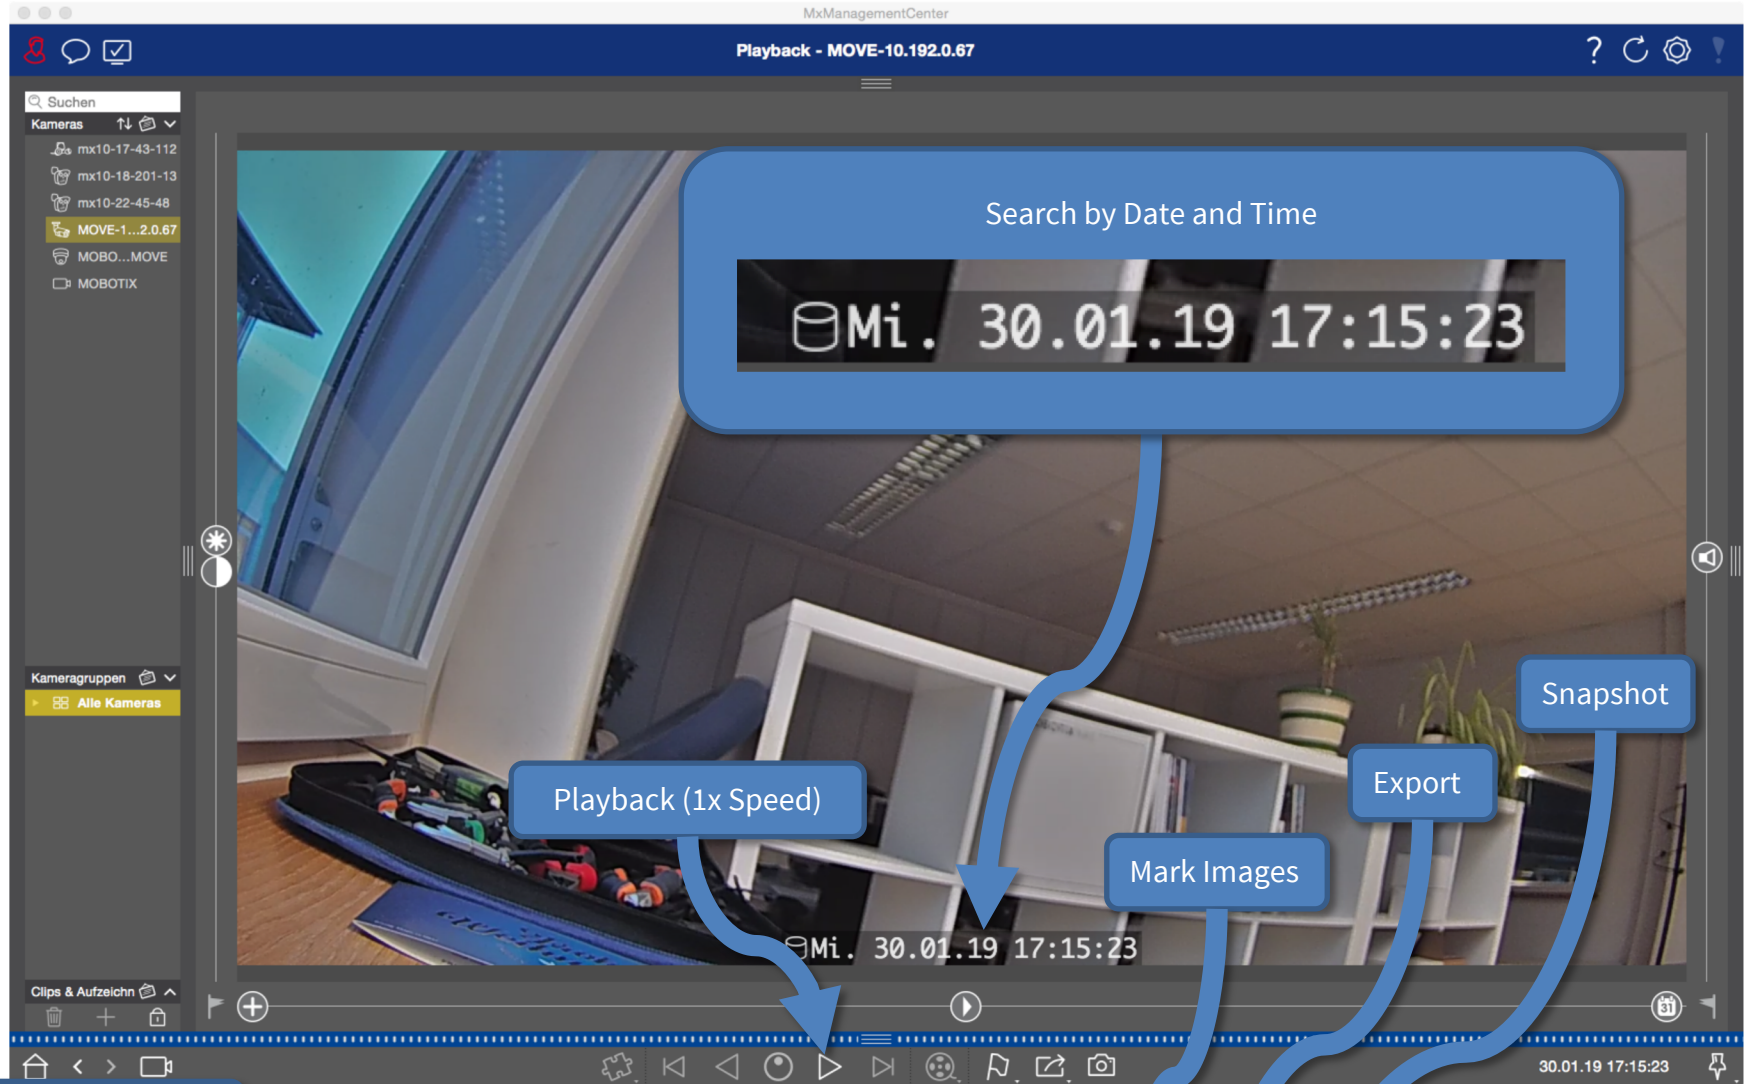

1. Select Type **MOBOTIX NAS (ONVIF)**.
2. Enter MOBOTIX NAS IP Address.
3. Enter user name and password.
4. Click on **Test**.
5. Click on **Apply**.
6. Click on **OK**.

1. In the **Recording Settings** of MxManagementCenter, select the corresponding **Recording Path** (MOBOTIX NAS). Then make sure that the correct camera IP is specified under **Device Directory**.

The screenshot displays the MxManagementCenter interface. On the left, a sidebar shows a list of cameras: MOVE-10.192.4.124, M16Thermal, and M16. Below this is a 'Camera Groups' section with 'All cameras' selected. A blue circle with the number '1' is placed over the 'Recording Settings' option in the sidebar. The main area shows the 'Camera Configuration' dialog for the camera 'MOVE-10.192.4.124'. The 'Recording Settings' section is expanded, showing 'Recording Path' set to 'MxNAS_ONVIF_MxM...' and 'Device Directory' set to '10.192.4.124'. A red box highlights these two fields, with a blue circle containing the number '2' next to the 'Device Directory' dropdown. A blue callout box at the bottom right contains the following instructions:

1. Click on **Recording Settings**.
2. Select **Recording Path** you set up in previous step.

2. You can now play back the camera recordings in MxManagementCenter.
