

CERTIFICATE PENETRATION TEST

SySS GmbH
72072 Tübingen

hereby confirms that it carried out a penetration test for the company

MOBOTIX AG
67722 Langmeil

Test item: Web application of Mobotix network camera M73A in default configuration

Test period: March 26 to 31, 2020

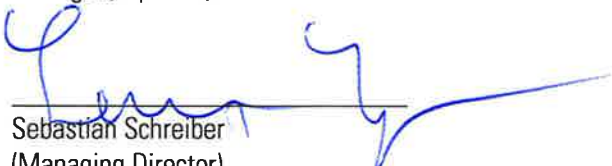

Test depth / resistance period: The simulated attack lasted 3.5 man-days

Summarized test results:

SySS GmbH hereby confirms that the test item resisted all attack activities throughout the above-mentioned test period and with the scheduled test depth. No major security flaws were detected.

Recommendation: SySS recommends that the test item be retested after every significant change or at the latest after one year.
