MOBOTIX MOVE NVR-16

MOBOTIX MOVE Plug & Play NVR Series

The MOBOTIX MOVE NVR “Plug & Play” series has been exclusively designed to support the MOBOTIX MOVE IP Camera series with powerful recording by deep integration protocols out-of-the-box. The integrated 16-port PoE switch allows direct connection of IP cameras without extra power supply. NVRs are equipped with M.2 (M-Key) and iSCSI communication interfaces that provide for seamless adaptation to the requirements of the installation. The web management interface allows monitoring and configuring PoE power consumption, network connection quality, and controlling the PoE power support of ONVIF S-conformant 3rd-party cameras. This provides flexibility in mixed camera environments besides the recommended usage with MOBOTIX MOVE IP camera series for full feature support. The MOBOTIX IoT camera range is fully integrated via ONVIF S.

- 2MP Full HD up to 4K IP camera support
- Integrated PoE switch with 16 ports for Plug & Play MOVE camera integration
- Can handle additional 8 Plug & Play MOVE cameras via external switch
- Support of MOBOTIX IoT cameras and 3rd-party cameras via ONVIF S protocol
- H.264/H.265 recording and playback
- Full HD local dual display/monitor output (HDMI/DisplayPort)
- iSCSI external NAS storage support
