

MOBOTIX HUB L3

For medium-sized businesses at multiple locations

MOBOTIX HUB L3 is the solution for medium-sized businesses. It supports unlimited cameras and can be distributed across multiple locations. The software allows you to manage all servers, cameras and users centrally.

MOBOTIX HUB L3 supports camera-based edge storage to minimize loss of video material. The solution is mainly used in places like schools, museums, hospitals and production facilities.

Reliable

Designed to give you the most reliable recording engine in the industry while boosting the overall performance of your hardware. Built by video surveillance experts to provide best-in-market performance you can always count on.

Customizable

Rather than being restricted to one company's product, the open platform architecture of MOBOTIX HUB L3 allows you to take advantage of dozens of verified and integrated solutions, maximizing the value of your surveillance system.

Scalable

With MOBOTIX HUB L3 you can scale the system to any size and any location, from small 10-camera systems to systems consisting of hundreds of cameras spread across multiple sites.

User-friendly

When you need to stay on top of the entire installation, from anywhere at any time so you can respond to incidents quickly, MOBOTIX HUB L3 provides it all.

Secure

When you want to reduce the security risk of your system and protect it against internal and external security threats in the most optimal way, you can rest assured that MOBOTIX HUB L3 gives you the protection you need.

Centralized Management

Central and single-point administration of all system components and settings.

Recording servers can be installed on an unrestricted number of sites or multiple servers on the same site.

Central access interfaces to live and recorded video from all connected sites.

HIGHLIGHTED FEATURES

Hardware Acceleration

Supporting hardware-accelerated video motion detection gives you the best system performance in the industry while lowering the overall system costs.

Two-Way Audio

Actively monitor entry points and communicate with people at gates with two-way audio support.

Recording rate min. 3.1 Gbit/s

Running on the market's best-performing recording engine, you get a reliable system you can count on.

Push Notifications

Support for push notifications gives you peace of mind, knowing the system will automatically notify you if anything needs your attention.

HUB SDK

The open platform architecture and the MOBOTIX HUB software development kit (HUB SDK) enable powerful integration with virtually unlimited functionality.

Metadata

Add additional value by linking video with metadata like GPS coordinates, heat maps, motion data and facial recognition.

Rule Engine

A built-in Rule Engine makes it possible to automate a wide range of security functions, increasing operational efficiency by eliminating the need for manual intervention.

Plug-in Extensions

This wide range of system extensions (plug-ins) allows you to adapt MOBOTIX HUB even more accurately to meet your requirements and fit your existing system infrastructure.

H.265

Reduce the cost of video storage by using the latest H.265 video compression technology.

Unrestricted

With support for an unrestricted number of users, cameras, and servers, you can spread the installation across multiple servers and sites.

Upgrade

A simple license exchange will upgrade your current system to one of the more advanced MOBOTIX HUB solutions, unlocking more opportunities for you and your business.

Multi-Layer Maps

See the whole picture and immediately take action with multi-layer maps displaying live video feeds and exact camera locations.

Alarm Manager

Work smarter with the built-in Alarm Manager, providing a consolidated overview of security and system alarms for immediate visual verification.

Bookmarks

Bookmark video sequences of special interest while watching live or playback video and make video investigation more efficient.

Centralized Search

Save time and work efficiently with Centralized Search that helps you quickly find what you're looking for in a single place.

Central Management

Scale your system while effectively managing everything from one central location with centralized management.

Edge Storage

With Edge Storage support you can design a flexible and reliable solution optimized for bandwidth availability, while offering recording redundancy during system failures or maintenance downtime.

User Access

If multiple users need to access the system, you can effectively control each user's access permissions on the viewing client level.

Dual Authentication

Offer an additional level of security by granting the user access to the viewing interface only when a second user has confirmed the login with dual authentication.

Encryption

Certificate-based encryption to secure the communication of data (video, audio, metadata) originates in the Recording Server and is retrieved by connected components.
