

# Double Authentication Control **MOBOTIX**

## FF LPR/MMCR App on MOBOTIX M73 and S74 cameras

Implement Double control via vehicle parameters detection to increase security for:

- Gated communities
- Closed perimeters
- Factories, ports, logistic centers

### Solution Benefits:

- Check all vehicle parameters on entry / exit
- Real-time data on full vehicle parameters for higher security
- Data flow 24/7
- Get alerted in case of any vehicle parameters mismatch (i.e. License Plate and Vehicle Make)

### Description:

You can make the tenants of your community feel safer or provide more data for analysis to security service at the harbours. MOBOTIX camera with FF LPR/MMCR App detects those with untidy intentions before they even act. Identify any vehicle with a mismatch of registered plate and vehicle make. If the license plate is present in the database and corresponds with the vehicle make the MxMC (MOBOTIX Management Center) send real-time-messages alerts to block the barrier opening. Alternatively, banned plates notifications on a suspicious vehicle entry / exit could be pushed with all parameters (Vehicle Make/Model and Color)

### You will need:

Install M73 or S74 MOBOTIX camera with FF Group LPR+MMCR App on entry and exist of closed perimeter

Send data processed on camera to MxMC (MOBOTIX Management Center) or the 3rd party system for barrier management

### What you should expect:

Accuracy of vehicle LPR recognition is > 95% (out of all vehicle count)

MMCR is > 90% (out of all vehicle count)  
6 Types, 11 colours, 74 Makes,  
789 Models

High performance camera application

Allowance / banned list management in camera

Supported countries:  
EU+CIS, South Africa, Australia,  
New Zealand
