

CERTIFICATE PENETRATION TEST

SySS GmbH
72072 Tübingen

hereby confirms that it carried out a penetration test for the company

MOBOTIX AG
Intelligent IP Video Solutions
67722 Langmeil

Test item: Web application of the Mobotix IP camera M16 in the default configuration

Simulated attack scenarios:

- a) Perpetrator in the local network without credentials
- b) Perpetrator has a valid login

Scenarios excluded from the test:

- a) Physical attacks on the camera's hardware

Test period: April 6 to 9, 2021

Test depth / resistance period: The simulated attack lasted 3,5 man-days (actual test period)

Summary of test results:

"SySS GmbH hereby confirms that the test item resisted all attack activities throughout the above-mentioned test period and with the scheduled test depth. No major security flaws were detected."

Recommendation: SySS recommends that the test item be retested after every significant change or at the latest after one year.
