

COMPACT COMPLETE COST-EFFECTIVE

MOBOTIX MOVE All-in-one Video Solution With License-free Operating Software and App

- No compromise on quality: cyber-secure standalone video system including recording
- No time-consuming installation: direct connection and PoE supply for up to 24 cameras
- No compromise on performance: with Intel high-performance processor
- no PC, no video server, no licenses and no technical expertise required
- No extra costs: there are no further costs to pay once the system has been installed
- No risk: qualified MOBOTIX partners offer support and assist with purchasing and installation

The perfect local video surveillance solution with the ability to connect up to 24 professional network cameras

As a compact end-to-end video solution, **MOBOTIX MOVE** is recommended for all kinds of security applications. In addition to live videos and playback videos at resolutions of up to **Full HD and including sound**, **all other video analysis functions** of MOBOTIX MOVE cameras can be used, such as video motion detection, behavior detection, object counting, periodic recording, noise alert, tamper alert, signal via external input and manual triggering.

MOBOTIX MOVE

Premium MOBOTIX MOVE Cameras

The **MOBOTIX MOVE** camera series comprises three different camera types with different specifications: **PTZ SpeedDome cameras**, **bullet cameras** and **dome cameras**. Depending on the model, these premium weatherproof IP cameras offer top-of-the-range features such as a **maximum resolution of 4K**, **integrated Deep learning-based video analytics**, **infrared illumination**, **automatic day/night switchover**, **Wide Dynamic range (WDR)**, or **motorized one-push auto focus** and **high-speed PTZ**.

MOBOTIX MOVE NVR All-in-one Devices with up to 64 Channels

MOBOTIX MOVE NVR is available in three different desktop versions (optional 19" rack-mounting kit available) with **8, 16 and 24 integrated PoE ports**. This allows **24 MOBOTIX MOVE PoE cameras** to be connected directly to each other and supplied with power simultaneously. It's also possible to connect another **4, 8 or 40** (depending on NVR model)

externally powered cameras respectively. This means that even cameras which are physically further away (for example in an adjacent building) can be connected to the **MOVE NVR's LAN port** via an additional **PoE switch** — with only one network connection cable.

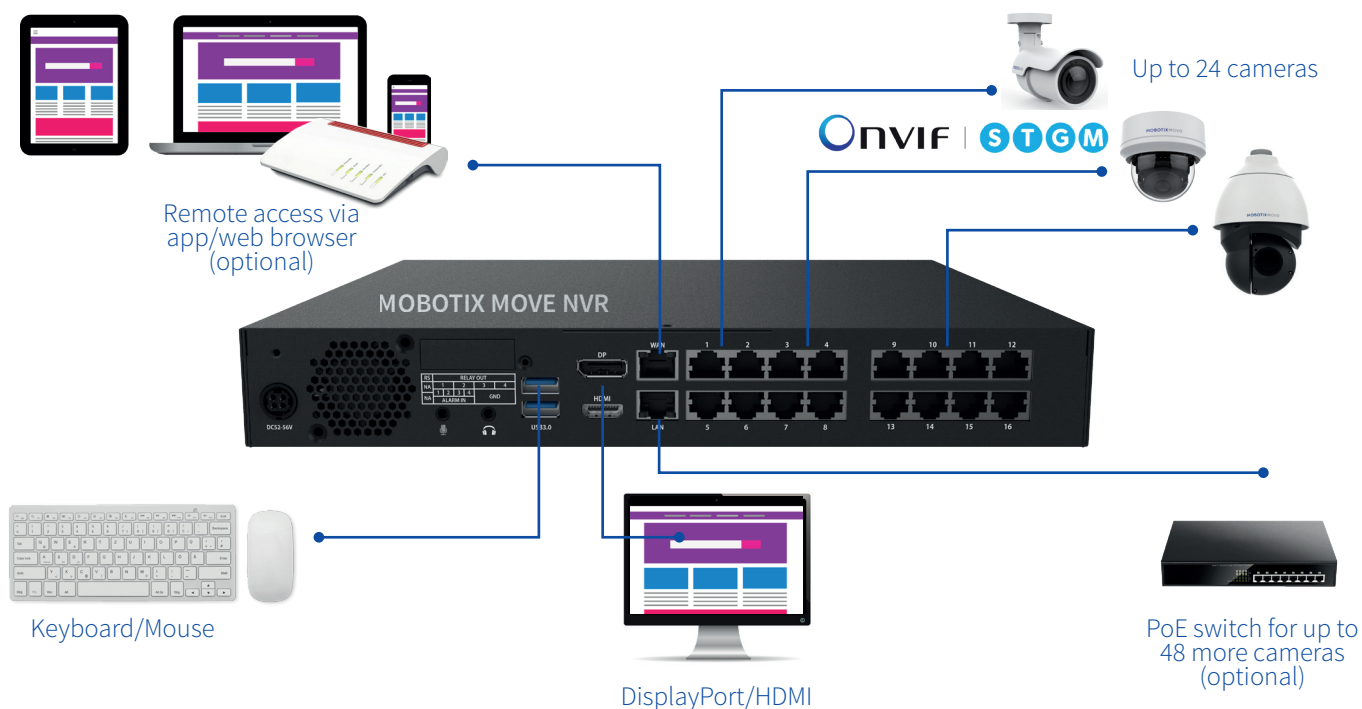

Preinstalled on Every NVR: Free Video Management Software

Thanks to the system's **video management software** (incl. virtual joystick and integrated site plans), which is highly intuitive to use, specially tailored to **MOBOTIX MOVE** cameras and built directly into the device firmware—plus the **ability to directly connect** up to two high-resolution displays, a keyboard, mouse and joystick—a single **MOBOTIX MOVE NVR** can replace an entire video workstation PC.

MOBOTIX
BeyondHumanVision

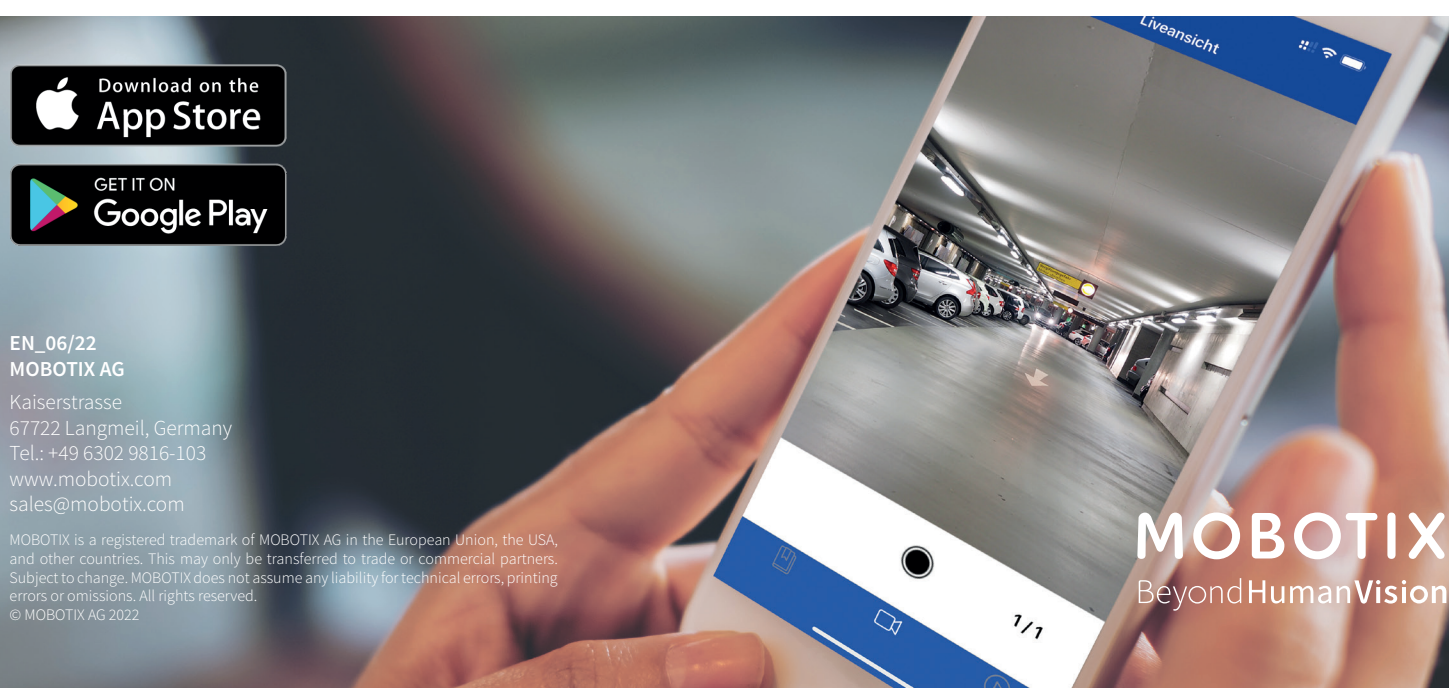

MOBOTIX MOVE NVR with individually determinable Hard Disk Capacity

In addition to **100% live operation** (decoder function), a MOBOTIX MOVE NVR can also manage **continuous or event-triggered recordings** taken by the connected cameras. Using the recorder functionality requires **additional hard disk drives (HDD) per NVR** (not available from MOBOTIX, installed inside the device housing). For demanding 24/7 use in video surveillance, MOBOTIX recommends suitable HDD models (3.5" SATA3) such as Seagate SkyHawk or Western Digital Purple with 8 or 14 TB each.

For iOS and Android: Free MOBOTIX MOVE NVR App

The **MOBOTIX MOVE NVR app** can be **downloaded free of charge** from the App Store or Google Play. This mobile VMS solution enables you to view and control all the MOBOTIX MOVE cameras connected to a MOBOTIX MOVE NVR (Live View, Playback View). An additional Wi-Fi connection is needed to connect the app to the MOBOTIX MOVE NVR and cameras locally. A **global remote connection** is also possible.
