

MOBOTIX THERMAL SOLUTIONS

MOBOTIX Thermal – Quality Assurance

Monitor Processes, Reduce Costs and Increase Profits

- Product and quality assurance
- Process and temperature monitoring
- Preventive maintenance of machines
- Weatherproof, rugged systems
- Reliable even in harsh environments
- Made in Germany

MOBOTIX M73 Thermal/TR

Precise Quality Assurance With MOBOTIX for Optimal Profits

The targeted use of **MOBOTIX thermal technology** can help you **improve the quality and effectiveness** of your processes, which **saves you money** and **boosts your profits**.

With a MOBOTIX video system, you can monitor up to 20 areas with individual thresholds in the camera's field of view. This makes the system **flexible, accurate**, and ensures that **false alarms are avoided**.

Comprehensive Quality Assurance

- Monitor production processes and the temperature of workpieces.
- **Avoid material loss** by **taking early action** as soon as tolerance limits are exceeded or undercut.
- **Ensure the quality of goods** during storage and transport, for example when monitoring cold chains.
- MOBOTIX thermal technology **automatically detects and reports** critical temperature deviations — whether it's too hot or cold.

Preventive Maintenance of Machines and Components

- Reliable detection of overloading, wear and damage to machines and components via **contactless measurement**.
- Take early action, **avoid consequential damage, stoppages** and **production downtime**, and save money!

Reliable Even In Extreme Conditions

- MOBOTIX video systems are designed for **harsh environmental conditions**.
- The cameras withstand extreme temperatures, dust, humidity and dirt.
- The low-maintenance MOBOTIX video systems are impressively durable with an MTBF (Mean Time Between Failure) of more than nine years and a **5-year warranty on all hardware**.
