

## Technical Specifications

## MOBOTIX M16B Thermal-TR

## Twice As Secure. Even In Total Darkness.

The intelligent video system with an integrated high-performancethermalimage sensor takes full advantage of the M16B Thermal TR camera design. Thanks to the two directly adjacent lenses, there is also a thermal overlay function with image overlay (thermal and optical) to pinpoint the exact location of hotspots like smoldering fires in a visible image. The MOBOTIX TR cameras feature a calibrated thermal image sensor. Thermal radiation measurements made across the entire image area can be used to trigger an event based on the temperature increasing above or decreasing below an individually set trigger level (camera alarm, network message, activation of a signal output etc.).

- Mx6 system platform 2nd generation, with MxBus, H. 264 and ONVIF compatibility
- Fixed premium thermal image sensor with an NETD of 50 mK
- Thermal Radiometry for measurable added value: calibrated thermal image sensor
- Thermal field of view: $45^{\circ}, 35^{\circ}, 25^{\circ}$ or $17^{\circ}$
- Additional image sensor module options
- Recording on an internal MicroSD card (4GB as standard)
- Integrated microphone and speaker
- MxActivitySensor can also be used in total darkness
- PoE thermal camera with a power consumption of < 10 W

NOTE! Ceiling mount bracket MX-DH-M24-SecureFlex can be ordered as optional accessory.

## General Product Information

## Basic Information On Thermal Imaging Technology

Thermal imaging technology is a contactless imaging procedure that makes it possible to see the thermal radiation from an object or body otherwise invisible to the human eye (mid-wavelength infrared). Thermal radiation is electromagnetic radiation emitted by a body based on its temperature. It is caused by thermal motion within a body's molecules. This is the result of accelerated charges that emit radiation in accordance with the laws of electrodynamics. Thermal imaging technology captures and displays temperature distribution across surfaces and objects. Thermographic cameras usually display heat intens-
 ity information in artificial colors (blue = cooler, red = warmer). In terms of the number of pixels, the resolution is considerably lower than that for cameras capturing the visible spectral range.
Unlike cameras with optical image sensors, one of the decisive quality criteria for a thermal camera is the camera's ability to capture the slightest differences in temperature and to produce an image that displays these differences in colors. The NETD, or Noise Equivalent Temperature Difference, is used to measure the sensitivity of a thermal sensor and is expressed in millikelvin. With an NETD of 50 mK, MOBOTIX thermal cameras can visualize temperature variations starting at $0.05^{\circ} \mathrm{C}$, which places them in the top range of cameras currently available for general use.

Fig. 1: Thanks to an NETD of 50 mK , the MOBOTIX thermal image (left) shows significantly more details than a competitor's less powerful thermographic camera with an NETD of 100 mK (right).

## Respecting Privacy

The detected thermal profile of a thermal camera shows no identifiable details for identification of persons and can therefore guarantee privacy. As soon as an object is moving into the relevant surveillance area, MOBOTIX dual camera system can automatically switch from thermal sensor to the optical sensor, producing visible high resolution video. This unique MOBOTIX feature combines two aspects, respecting the privacy aspect and at the same time optimal video surveillance.

## Temperature Events And Thermal Overlay

Thermal radiometry (TR) cameras from MOBOTIX generate automatic alarms, defined by temperature limits or temperature ranges, which is vital to detect potential fire or heat sources. Up to 20 different temperature triggers can be defined at the same time within so-called TR (Thermal Radiometry) windows or the whole sensor image can be used over the temperature range of -40 to $+550^{\circ} \mathrm{C}$. In this way critical situations can be analyzed in the control room in order to plan the next steps for effective fire prevention. Critical assets like emergency generators, wind turbines or radio stations can be cost-effectively maintained and tested remotely. MOBOTIX thermal dual camera systems offer thermal overlay to localize so-called hot spots in the visual image to prevent larger damage. The standard Power-over-Ethernet (PoE) compatibility and the extremely low power consumption of only 6 watts allows operation of MOBOTIX thermal camera systems in every situation.

## Technical Specifications MOBOTIX M16B Thermal-TR

NOTE! Special Export Regulations For Thermal Cameras apply!
Cameras with thermographic image sensors ("thermographic cameras") are subject to special U.S. and ITAR (International Traffic in Arms Regulation) export regulations:

According to currently valid export regulations from the U.S. and ITAR, cameras with thermographic image sensors or their component parts cannot be exported to countries that have been embargoed by the U.S./ITAR. The corresponding delivery ban also applies to all individuals and institutions included on "The Denied Persons List" (see www.bis.doc.gov under Policy Guidance > Lists of Parties of Concern). These cameras and their installed thermographic image sensors are not to be used for the design, development, or production of nuclear, biological or chemical weapons or installed in these systems.

Thermal End User Statement on MOBOTIX Website

## Product Information

| Specialties | Thermographic IP camera with Thermal Radiometry technology (TR) <br> and Germanium lens; can be optionally equipped with a second <br> optical 6MP sensor module (day/color or night/black and white to be <br> ordered separately for easy self-assembly) |
| :--- | :--- |
| Area of Application | TR temperature measurement of each pixel in the whole image area, <br> up to 20 independent temperature events |

## Thermal Lenses/Sensors, 50 mK, $336 \times 252$ (Factory-Assembled)

| Calibrated Thermal sensor | Mx-M16TB-R075 |
| :--- | :--- |
| TR/Thermal Radiometry, horiz./vert. | Mx-M16TB-R079 |
| image angle $42^{\circ} / 32^{\circ} \& 45^{\circ} / 35^{\circ}$ |  |$\quad$ Mx-M16TB-R090

# Optical Lenses/Sensors, 6MP, $3072 \times 2048$ (Available With Optional Sensor Module) 

Sensor module with Fisheye Lens B016 ( $180^{\circ} \times 180^{\circ}$ ), night version optionally with long-pass filter (LPF)

Sensor module with Ultra Wide Lens B036 ( $103^{\circ} \times 77^{\circ}$ ), night version optionally with LPF

Day/Color: Mx-O-SMA-S-6D016 Night/Black\&White: Mx-O-SMA-S-6N016 LPF/Black\&White: Mx-O-SMA-S-6L016

Day/Color: Mx-O-SMA-S-6D036 Night/Black\&White: Mx-O-SMA-S-6N036 LPF/Black\&White: Mx-O-SMA-S-6L036

Sensor module with Super Wide Lens Day/Color: Mx-O-SMA-S-6D041 Night/Black\&White: Mx-O-SMA-S-6N041 B041 $\left(90^{\circ} \times 67^{\circ}\right)$, night version option- LPF/Black\&White: Mx-O-SMA-S-6L041 ally with LPF

Sensor module with Wide Lens B061 $\left(60^{\circ} \times 45^{\circ}\right)$, night version optionally with LPF

Sensor module with Standard Lens B079 ( $45^{\circ} \times 34^{\circ}$ ), night version option- LPF/Black\&White: Mx-O-SMA-S-6L079 ally with LPF

Sensor module with Tele Lens B119 ( $31^{\circ} \times 23^{\circ}$ ), night version optionally with LPF

Sensor module with Distant Tele Lens $\mathrm{B} 237\left(15^{\circ} \times 11^{\circ}\right)$, night version optionally with LPF

Sensor module with Super Tele Lens B500 ( $8^{\circ} \times 6^{\circ}$ ), night version optionally with LPF

Sensor module with CS-Mount (no lens included)

Sensor module with CSVario Lens B045-100-CS

Day/Color: Mx-O-SMA-S-6D119 Night/Black\&White: Mx-O-SMA-S-6N119 LPF/Black\&White: Mx-O-SMA-S-6L119

Day/Color: Mx-O-SMA-S-6D237 Night/Black\&White: Mx-O-SMA-S-6N237 LPF/Black\&White: Mx-O-SMA-S-6L237

Day/Color: Mx-O-SMA-S-6D500 Night/Black\&White: Mx-O-SMA-S-6N500 LPF/Black\&White: Mx-O-SMA-S-6L500

Day/Color: Mx-O-SMA-S-6DCS
Night/Black\&White: Mx-O-SMA-S-6NCS
Day/Color: Mx-O-SMA-S-6DCSV
Night/Black\&White: Mx-O-SMA-S-6NCSV

Image sensor with individual expos- $1 / 1.8^{\prime \prime}$ CMOS, 6 MP ( $3072 \times 2048$ ), Progressive Scan Color or Black And ure zones White

Light sensitivity in lux at $1 / 60 \mathrm{~s}$ and Color Sensor: $0,1 / 0,005$ Black And White Sensor: 0,02/0,001 $1 / 1 \mathrm{~s}$

## Technical Specifications <br> MOBOTIX M16B Thermal-TR

## Hardware

| Microprocessor | iMX 6 Dual Core incl. GPU (1 GB RAM, 512 MB Flash) |
| :---: | :---: |
| H. 264 Hardware-Codec | Yes, bandwidth limitation available; output image format up to QXGA |
| Protection class | IP66 and IK06; with second 6MP sensor module: IK04 with B036 to B237, IK06 with B016 |
| Intended use | Not for use in hazardous areas (Ex area); no mounting behind glass windows |
| Ambient temperature (range, incl. storage) | -40 to $60^{\circ} \mathrm{C} /-40$ to $140^{\circ} \mathrm{F}$ (cold boot from $-30^{\circ} \mathrm{C} /-22^{\circ} \mathrm{F}$ ) |
| Internal DVR, ex works | 4 GB (microSD) |
| Microphone/speaker | Microphone Sensitivity: $-35+/-4 \mathrm{~dB}(0 \mathrm{~dB}=1 \mathrm{~V} / \mathrm{pa}, 1 \mathrm{kHz})$ Speaker: 0.9 W at 8 Ohm |
| 16bit/16kHz HD wideband audio (Opus codec) | Yes (live and audio messages) |
| Passive infrared sensor (PIR) | Yes |
| Temperature sensor | Yes |
| Shock detector (tamper detection) | Yes |
| Power consumption (typically at $20^{\circ} \mathrm{C} / 68^{\circ} \mathrm{F}$ ) | 9 W (10 W possible over the short term) |
| PoE class (IEEE 802.3af) | Class 2 or 3 (variable), factory setting: class 3 (required for thermal operation) |
| Interfaces Ethernet 100BaseT/MxBus/USB | Yes (MxRJ45)/Yes/Yes |
| Interface RS232 | With accessory (MX-232-IO-Box) |
| Mounting options | Wall, pole or ceiling (wall and ceiling mount included) |
| Dimensions <br> (height x width x depth) | With wall mount bracket (default): $244 \times 158 \times 239 \mathrm{~mm}$ <br> With ceiling mount bracket (optional accessory MX-DH-M24- <br> SecureFlex): $210 \times 158 \times 207 \mathrm{~mm}$ |
| Weight | $1,320 \mathrm{~g}$ |

## Technical Specifications MOBOTIX M16B Thermal-TR

| Housing | PBT-30GF, color: white |
| :--- | :--- |
| Standard accessory | Screws, dowels, screw caps, 2 Allen wrenches, module key, VarioFlex <br> wall and ceiling mount with rubber sealing, 0.5 m ethernet patch <br> cable, 1 blind module, Quick Install |
| Detailed technical documentation | $\underline{\text { www.mobotix.com > Support > Download Center }}$ |
| Online version of this document | $\underline{\text { www.mobotix.com > Support > Download Center }}$ |
| MTBF | $>80,000$ hours |
| Certifications | EN55032:2012 |
|  | EN55022:2010; EN55024:2010 EN61000-6-1:2007; EN 61000-6-2:2005 |

## Image Formats, Frame Rates, Image

## Storage

| Available video codecs | MxPEG/MJPEG/H. 264 |
| :---: | :---: |
| Image formats | Freely configurable format 4:3, 8:3, 16:9 or customized format (Image Cropping), such as $2592 \times 1944$ (5MP), 2048×1536 (QXGA), 1920x1080 (FullHD), 1280×960 (MEGA) |
| Multistreaming | Yes |
| Multicast stream via RTSP | Yes |
| Max. image format (dual image from both sensors) | $2 \times 6 \mathrm{MP}(6144 \times 2048)$ |
| Max. frame rate for thermal images, Thermal Overlay and dual images (thermal \& optical) | 9 frames per second (fps) |
| Max. frame rate for optional optical 6MP sensor module (fps, only single core used) | MxPEG: 42@HD(1280x720), 34@Full-HD, 24@QXGA, 15@5MP, 12@6MP, 6@2x 6MP MJPEG: 26@HD(1280x720), 13@Full-HD, 9@QXGA, 5@5MP, 4@6MP, 2@2x 6MP H.264: 25@Full-HD, 20@QXGA |
| Number of images with 4 GB microSD (internal DVR) | CIF: 250,000, VGA: 125,000 , HD: 40,000, QXGA: $20,000,6 \mathrm{MP}: 10,000$ |

## General Functions

| TR temperature measurement in the <br> whole image area | Yes |
| :--- | :--- |
| Event trigger for temperatures above <br> or below a limit between -40 to <br> $550^{\circ} \mathrm{C} /-40$ to $1022^{\circ} \mathrm{F}$ |  |
| Digital zoom and pan | Yes |
| ONVIF compatibility | Yes (Profile S, audio support with camera firmware V5.2.x and higher) |
| Genetec protocol integration | Yes |
| Programmable exposure zones | Yes |
| Snapshot recording (pre/post-alarm | Yes |
| images) |  |
| Continuous recording with audio | Yes |
| Event recording with audio | Yes |
| Time controlled flexible event logic | Yes |
| Weekly schedules for recordings and | Yes |
| actions |  |
| Event video and image transfer via | Yes |
| FTP and email |  |
| Playback and QuadView via web | Yes |
| browser |  |
| Bidirectional audio in browser | Yes |
| Animated logos on the image | Yes |
| Master/Slave functionality | Yes |
| Privacy zone scheduling | Yes |
| Customized voice messages | Yes |
| VolP telephony (audio/video, alert) | Yes |
| message) |  |

## Technical Specifications

## MOBOTIX M16B Thermal-TR

| Programming interface (HTTP-API) | Yes |
| :--- | :--- |
| DVR/Storage Management | Inside camera via microSD card, externally via USB device and NAS, <br> different streams for live image and recording, MxFFS with archive <br> function, pre-alarm an post-alarm images, monitoring recording with <br> failure reporting |
| Camera and data security | User and group management, SSL connections, IP-based access con- <br> trol, IEEE802.1x, intrusion detection, digital image signature |
| MxMessageSystem: <br> Sending and receiving of MxMes- <br> sages | Yes |
