

# Quick Installation

## MOBOTIX MOVE 4K (8MP) Vandal Fixed Dome Analytics Camera Mx-VD1A-8-IR-VA

© 2024 MOBOTIX AG

### NOTE!

This guide is only valid for **installing and connecting** the 4K (8MP) Vandal Fixed Dome Analytics Camera. For more information on the camera, please refer to the other documents (see [Further Reading](#), p. 8).

### Important Installation Notes

- This camera must be installed by qualified personnel and the installation should conform to all local codes.
- This product must not be used in locations exposed to the dangers of explosion.
- Do not look directly into the infra-red LEDs that may be active on the product.
- Do not use this product in a dusty environment.
- Protect this product from moisture or water entering the housing.
- Install this product as outlined in this document. A faulty installation can damage the product!
- Do not replace batteries of the camera. If a battery is replaced by an incorrect type, the battery can explode.
- This equipment is not suitable for use in locations where children are likely to be present.
- External power supplies must comply with the Limited Power Source (LPS) requirements and share the same power specifications with the camera.
- When using a Class I adapter, the power cord shall be connected to a socket-outlet with proper ground connection.
- To comply with the requirements of EN 50130-4 regarding the power supply of alarm systems for 24/7 operation, it is highly recommended to use an uninterruptible power supply (UPS) for backing up the power supply of this product.

**NOTE!** Observe the [MOBOTIX MOVE Installation Hints](#) document to ensure optimum performance of the camera features.

### Camera Connectors

No.	Connector	Pin	Definition	Remarks
1	RJ-45	-	For network and PoE connections	
2	BNC*	1	BNC	For analog video output
		2	GND	
3	Power (AC24V/DC12V)	1	AC 24V 1	Power connection
		2	AC 24V 2	
		3	DC 12V 1	
		4	DC 12V 2	

No.	Connector	Pin	Definition	Remarks
4	Reset Button	-	Press the button with a proper tool for at least 20 seconds to restore the camera.	
5	microSD Card Slot	-	Insert the microSD card into the card slot to store videos and snapshots. Do not remove the microSD card when the camera is powered on.	
6	Alarm & Audio I/O	1	Audio In L	Audio In (Line In)
		2	Audio In R	
		3	GND	Ground connection
		4	Audio Out L	Audio Out (Line Out)
		5	Audio Out R	
		6	Alarm Out +	Alarm connection
		7	Alarm Out –	Do <b>NOT</b> connect external power supply to the alarm I/O connector of the IP camera.
		8	Alarm In +	
		9	Alarm In –	

\*Contact the manufacturer for the compatible BNC cable.

## microSD Card Slot/Reset Button

**CAUTION!** Always power down the camera before performing the following steps!

### microSD Card Slot

**CAUTION!** Always power down the camera before performing the following steps!

Insert a microSD card into the card slot to store videos and snapshots.

#### NOTE!

- It is not recommended to record with the microSD card for 24/7 continuously, as it may not be able to support long term continuous data read/write. Contact the manufacturer of the microSD card for information regarding the reliability and the life expectancy.
- Remember to format a new microSD card as shown in [Formatting Storage Media](#) below.

### Reset Button

Press the reset button with a proper tool for at least 20 seconds to restore the system.

### Connecting Power

#### Using Power over Ethernet (PoE)

Use a PoE switch (Class 0) and connect the Ethernet cable to the RJ-45 port of the camera.

#### Using AC or DC

To power up the camera, connect **either the AC or the DC** power adapter to the power connector of the camera and the power outlet.

**CAUTION!** Never connect both AC and DC power since **this will cause unforeseeable damage.**

#### Zero Downtime Power Switching (ZDT)

If the camera is connected to two power sources, it will switch the power input seamlessly in this order:

- **AC and PoE connected:** AC > PoE
- **DC and PoE connected:** PoE > DC

**CAUTION!** Never connect both AC and DC power since **this will cause unforeseeable damage.**

### Ethernet Cable Connection

Connect one end of the Ethernet cable to the RJ-45 connector of the camera and plug the other end of the cable into the network switch or PC.

#### NOTE!

- The length of the Ethernet cable should not exceed 100 m/300 ft.
- Check the status of the link indicator and the activity indicator LEDs of the switch. If the LEDs are unlit, please check the LAN connection.
- In some cases, an Ethernet crossover cable may be needed when connecting the camera directly to the PC.

#### Ethernet Connector LEDs

- Green **Link** LED indicates good network connection.
- Orange **Activity** LED flashes to indicate network activity.

**NOTE!** The ITE is to be connected only to PoE networks without routing to the outside plant or equivalent description.

### Accessing the Camera

The 4K (8MP) Vandal Fixed Dome Analytics Camera supports all current browsers without requiring any additional plug-ins or add-ons (e.g. for H.264/H.265/MJPEG support).

#### Camera Login

The default IP address of the camera is: 10.x.x.x. By default, the camera starts as DHCP client and automatically tries to get an IP address from a DHCP server.

1. Enter the camera's IP address in the URL bar of the web browser and hit "Enter".
2. Enter the default username (**admin**) and password (**meinsm**).

**NOTE!** User names and passwords are case sensitive.

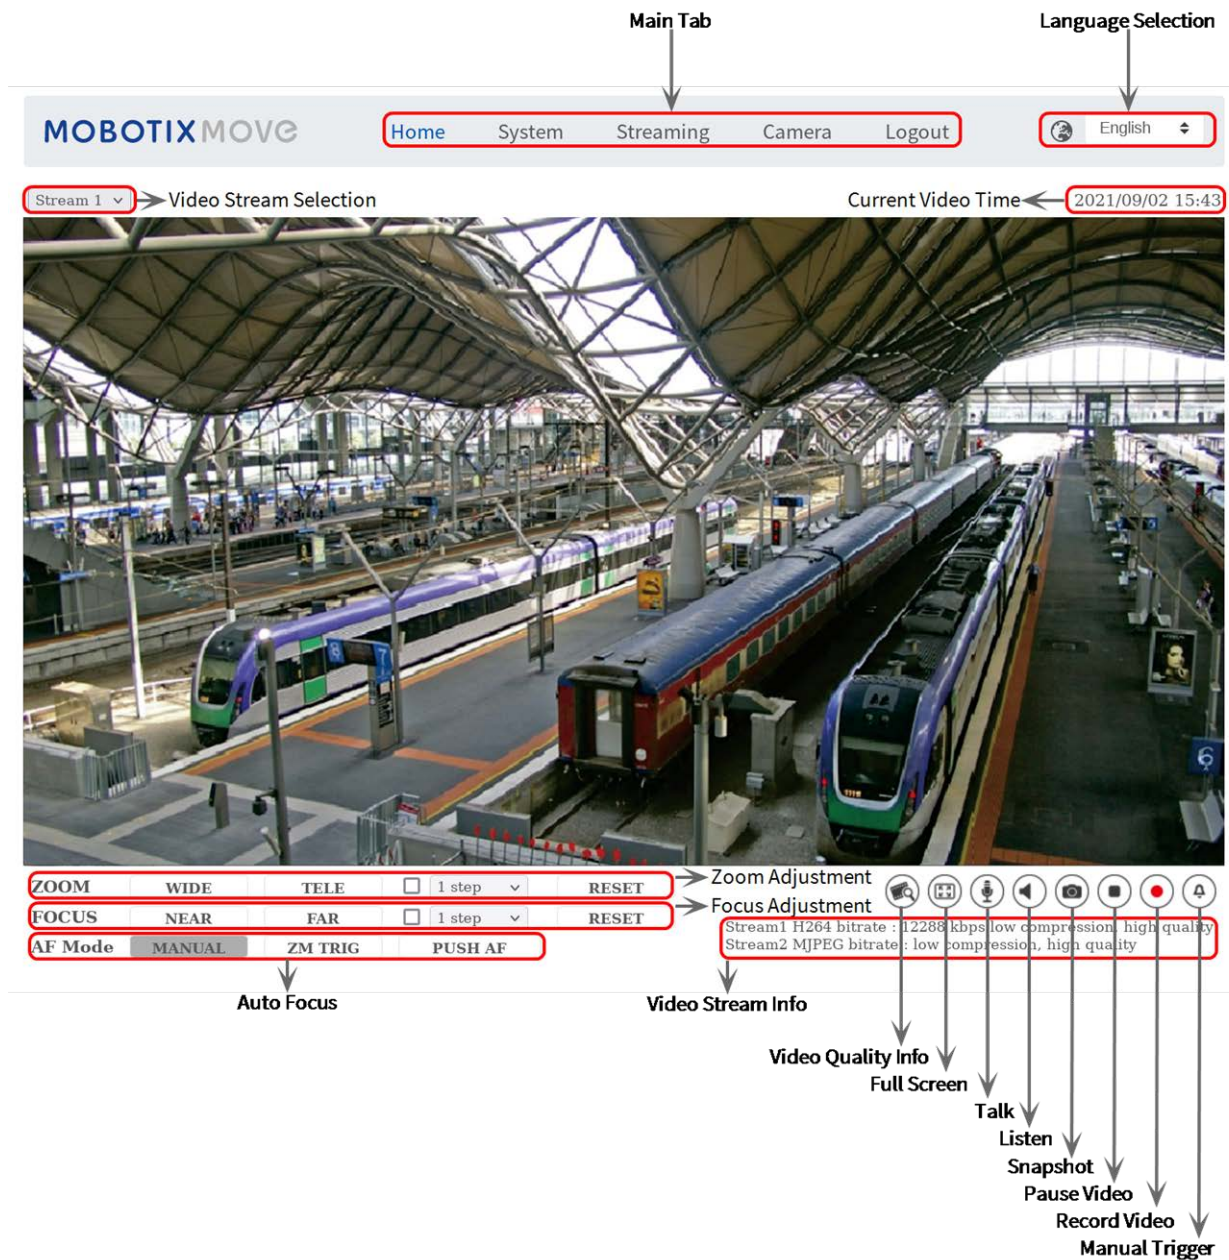

3. You will be prompted to set a new admin user password.

**NOTE!** The password can have between 6 and 14 characters (at least one digit, no special characters allowed).

4. After setting a new password, you will be prompted to log in again. Remember to use the new password.

### Browser-Based Viewer

The main page of the IP camera user interface is shown as the figure below. The function buttons vary depending on the camera model.

### Formatting Storage Media

After inserting a new or replacing a used storage medium, make sure to format the medium so the camera can use it to record video streams.

1. Connect to the camera.
2. Open **System > Storage Management > <storage media type>**.
3. In the **Device Setting** section, click on **Format** to start the formatting process.

Once formatting has finished, the camera can use the storage medium for recording.

### Camera Maintenance

It is recommended that you perform the following maintenance tasks at regular intervals to keep the 4K (8MP) Vandal Fixed Dome Analytics Camera in good working condition:

- Clean the dome using plain water and a soft cloth.

**CAUTION!** Do not use any detergents or alcohol to prevent damaging the coating!

- Check the mounting and make sure that all screws are properly tightened to prevent the camera from falling down.
- When opening the camera, add a silica gel dry pack to prevent condensation on the inside of the dome.
