

CONFIRMATION PENETRATION TEST

SySS GmbH
Schaffhausenstraße 77
72072 Tübingen

hereby confirms that it carried out a penetration test for the company

MOBOTIX AG
Kaiserstraße
67722 Langmeil

Test item: Web interface of the IP camera "MOBOTIX M1A-S" ("MOBOTIX ONE" IP camera platform)

Test period: February 5 to 20, 2025

Test depth / resistance period: The simulated attack lasted three person-days (actual test period). Both black box and white box testing methods were employed.

Summary of test results: Upon completion of all testing activities, SySS GmbH confirms that all security-related identified vulnerabilities were successfully remediated by MOBOTIX AG. As a result, the security-related requirements within the scope of the tests have been fulfilled.

Recommendation: SySS recommends that the test item be retested after every significant change or at the latest after one year.

Tübingen, April 14, 2025
