MOBOTIX 7 – Hemispheric
Technical Data

Q71/c71 – all-round view has never been more complete

When it comes to providing a 360° all-round view by day and night, MOBOTIX hemispheric camera technology is so compact, so complete and so versatile as never before. **A 4K UHD resolution** and WDR ensure **brilliant image quality and impressive details**. The audio function completes the range of features offered by these powerful pieces of equipment. Everything is well protected in the robust aluminum housing for discreet and reliable use.

IR and white light – the Q71 makes the night colorful!

For the first time, **day and night sensors, infrared and LED white light** are combined in a single hemispherical camera. This means that the Q71 delivers brilliant images around the clock – and thanks to the LED, **even the night can be viewed in spectacular color!**

IR light ON   White light ON
