

MOBOTIX S ONE Dual

Easy replacement of existing S15/S16 installations

Simply replace. Benefit immediately.

The **MOBOTIX S ONE Dual** is the direct successor to the S15 and S16 – for easy replacement without costly conversion, new network infrastructure, or long downtimes.

Why replacement is so easy:

- Identical aluminum mounting plate with the same holes as S15/S16 – no mechanical conversion required
- Sensor module openings identical (Ø 43 mm) – existing installation openings remain unchanged
- Existing sensor module mounts can continue to be used (exception: PTMounts from the first series)
- PoE supply Class 3 according to IEEE 802.3af – existing cabling remains unchanged
- Still only one IP address per camera

Your advantages through the exchange:

- ✓ More performance: Two 4K UHD Day&Night sensor modules for flexible alignment and brilliant image quality
- ✓ AI included: ActivitySensor ONE as standard – license-free AI analysis on both sensor modules simultaneously
- ✓ Extremely robust: IP66, IK10, NEMA 4X, –40 °C to +65 °C
- ✓ Highest level of cybersecurity – MOBOTIX Cactus Concept
- ✓ 5-year warranty – optionally extendable to up to 8 years – Made in Germany

Modernize now – without remodeling.

Simply replace your existing S15/S16 installation with the **MOBOTIX S ONE Dual** and immediately benefit from increased performance, security, and AI.
