

WHEN THE LIGHTS GO OUT, IT'S TOO LATE.

Sabotage has long been a reality.
Don't give intruders a chance.

Whether it's a substation, water treatment plant, or pumping station:

Critical utility facilities are prime targets for sabotage and tampering. Just a few minutes in the wrong place can disrupt supply and operations for days.

MOBOTIX's video and thermal sensor solutions detect suspicious activity before an intrusion leads to a service outage.

MOBOTIX combines video security, thermal technology, access control, and centralized management into an integrated security solution.

MADE IN GERMANY

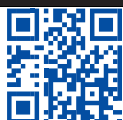

Why Traditional Security Isn't Enough

- ▶ Large, hard-to-monitor perimeters
- ▶ Remote and unmanned locations
- ▶ Long travel distances and limited personnel resources
- ▶ Disconnected systems and lack of situational awareness

What needs to be identified early on

- ▶ Real-time approach and intrusion
- ▶ People, vehicles, and conspicuous heat sources
- ▶ Sabotage, tampering, and fire hazards
- ▶ Relevant events instead of unevaluated alarms

MOBOTIX
BeyondHumanVision

ONE SYSTEM PROTECTS THE ENTIRE SITE.

FROM THE PERIMETER TO THE CONTROL CENTER.

Four protection zones. One shared platform.

1 PREMISES & BOUNDARIES

Video and thermal sensors detect people, vehicles, unusual activities, and heat sources.

2 FIRE & TEMPERATURE

Thermal systems detect critical temperature changes early on and enable targeted responses.

3 ACCESS ROUTES & ENTRANCES

License plate recognition, access control, and gatekeepers support controlled entry and exit.

4 CONTROL CENTER & MANAGEMENT

MOBOTIX HUB consolidates live video feeds, alarms, user permissions, and cross-site events.

Cyber-secure. Controllable. Made in Germany.

Decentralized processing, role-based access, and documentable security processes support a risk-based, traceable security architecture. Developed and assembled at the Winnweiler site in Rhineland-Palatinate.

HOW WELL ARE YOUR LOCATIONS PROTECTED TODAY?

Together, we'll identify blind spots and develop a robust security concept.
