

CERTIFICATE PENETRATION TEST

SySS GmbH
Schaffhausenstraße 77
72072 Tübingen

hereby confirms that it carried out a penetration test for the company

MOBOTIX AG
Kaiserstraße
67722 Langmeil

Test item: Web interface of the smart sensor "MOBOTIX c ONE NurseAssist"

Test period: August 3 to 7, 2026

Test depth / resistance period: The initial penetration test comprised ten person-days; the associated retest comprised one additional person-day (actual test time in each case). Both black box and white box testing methods were employed.

Summary of test results: Upon completion of all testing activities, SySS GmbH confirms that all identified vulnerabilities were successfully remediated by MOBOTIX AG. As a result, the security-related requirements within the scope of the tests have been fulfilled.

Recommendation: SySS GmbH recommends that the test item be retested after every significant change or at the latest after one year.
