

Security & Surveillance Monitor Solutions

EIZO Security & Surveillance Monitor Solutions

EIZO's security & surveillance monitor solutions meet the needs of a wide range of applications. Many of our products are built for 24-hour use to provide reliability and peace of mind for various environments including transportation hubs, medical facilities, businesses, government offices, and more.

Airports

Retail Shops

Medical Facilities

Public Transportation

Factories

Parks and Public Attractions

Government and Corporate Offices

Marine Ports and Ships

IP Decoding Solutions

EIZO's IP decoding solutions include 23-inch and 46-inch monitors, as well as an external box solution, that connect to multiple IP cameras with just a LAN cable. They feature powerful decoding performance, flexible video management, and long-term reliability for security & surveillance environments.

IP Decoding Monitors

IP Decoding Box

▶ Decodes H.264, MJPEG

▶ 23-inch and 46-inch sizes with full HD resolution (1920 × 1080)

▶ Register up to 16 IP cameras

▶ VESA mount support

▶ H.265, H.264, MJPEG

▶ Up to 4K UHD (3840 × 2160) to dual monitors (HDMI × 2)

▶ Register up to 64 IP cameras

▶ Directly attachable to the back of VESA-supported monitors or EIZO monitor stands

Functionality with Leading VMS

Integrated Solution

EIZO's IP decoding solutions do not require a PC, software, or other hardware to operate, greatly simplifying installation and saving on time and labor costs. This also eliminates several potential points of failure typical of a conventional setup by heavily reducing the amount of equipment used.

Customizable Event Response to VMS

The web API supports customizable integration with the local video management system (VMS). This allows events or alarm monitoring to be communicated from the VMS to the solution, instructing it to respond to a given event.

Example of automatic layout adjustment in response to key card usage.

Secure Investment with Support for Over 250 Cameras

All solutions support cameras with ONVIF Profile S, Axis VAPIX, and Panasonic protocols to ensure interoperability with a wide range of products.

Some features of DuraVision DX0211-IP planned for implementation at the end of 2019. See specifications on page 15 for details.

Secure Live Streaming

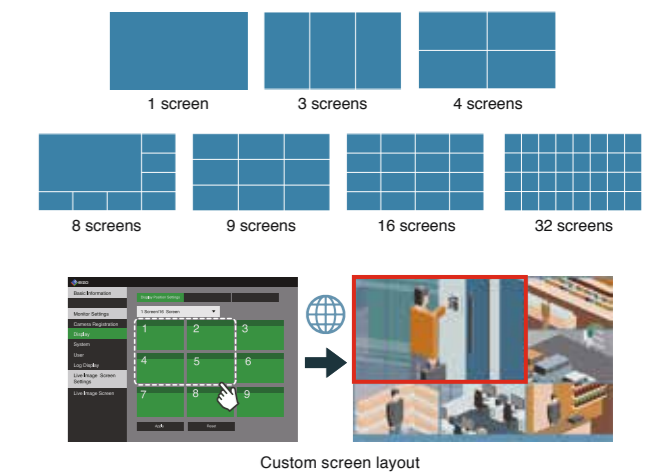

Connecting IP cameras directly to DuraVision IP decoding solutions allows for the live streaming of video without a decentralized recording solution, such as edge recording or cloud archiving.

Adjustable Screen Layout

Easily adjust the layout of the video streams with several default options. In addition, custom layout allows you to merge or split windows to create the ideal viewing environment.

32-screen layout available with DX0211-IP only.

24-Hour, 2-Year Warranty

EIZO's IP decoding solutions are built for 24-hour use and are backed by a 2-year manufacturer's warranty for long-term reliability.

Visibility Enhancement Monitors

Analog Input Monitors

Walibi Holland

Netherlands

Walibi Holland is one of the larger amusement parks in the Netherlands, welcoming 900,000 visitors. They use DuraVision IP decoding monitors for 24/7 park annually.

"Previously, we needed a lot of servers in order to gather the camera images and display them on a monitor. Now it is simply a matter of plug and play. Put the network plug into the monitor, configure, and the system is operational. EIZO is the only manufacturer able to provide us with this solution. Installation is very quick and saves us a lot of time. Moreover, the images are very sharp and displayed in realistic colors, which provides the operator with a clear image. This is very important when monitoring an attraction."

Kindred Health

USA

Kindred Health Transitional Care and Rehabilitation in Eagle Creek, Indiana, is a nursing home and rehabilitation center specializing in short-term rehabilitation therapy, bridging the gap between hospital and home, as well as long-term care. They use DuraVision IP decoding monitors at each nurse station to monitor activity in hallways, parking lots, and entrances with ease.

"At the time we installed the FDF2304W-IP monitors, it was a breeze thanks to the detailed instructions, easy-to-read icons, and user-friendly interface altogether. Everything is explained in detail throughout the entire installation and setup process, meaning you only have to visit the system once. I was able to customize the layout to meet their preferences."

Sopraco

Belgium

Sopraco is one of Europe's main meat suppliers for wholesalers, supermarket chains, butchers, and the hospitality industry. They use DuraVision IP monitors to manage video streams from over 100 IP cameras across the three routes between their facilities, 24/7.

"As we saw it, there were several reasons to choose the EIZO solution. Both the IP decoding monitors feature excellent image displays. Moreover, operating them doesn't require any computers, software, or other hardware that requires time-consuming update processes or might break down. This reduces the total cost of ownership for us. We can even carry out camera management in a flexible way through the user-friendly web interface during ongoing operations."

These speciality monitors are equipped with unique visibility enhancement technology for improving the clarity of security video footage in real time.

Monitors with Visibility Enhancement

DuraVision
FDF2306W (23" / 58 cm)
FDF2305W (23" / 58 cm)

Full HD (1920 × 1080) resolution

Up View function that minimizes color distortion when viewed from below

24-hour, 2-year warranty

Defog

The DuraVision FDF2306W's defog function enhances images that are affected by fog, snow, or other environmental factors that cause the video to appear hazy or unclear.

Low-Light Correction

Low-Light Correction detects areas of the screen that are dark and difficult to see and adjusts the brightness of each pixel. This reproduces highly visible images with a realistic sense of depth by brightening dark areas while keeping lighter areas from becoming washed out.

Equivalent technology for FDF2305W is called Smart Insight.

Outline Enhancer

Outline Enhancer analyzes the displayed content and ensures that noise is not accentuated while correcting blurred areas for a sharper, clearer image. For images with a great deal of depth, it sharpens the foreground more strongly to maintain a real-world sense of focus.

Equivalent technology for FDF2305W is called Smart Resolution.

Analog / Digital Input

DuraVision
FDS1903-A (19" / 48.2 cm)

1280 × 1024 resolution

BNC (composite) and HDMI inputs

Supports NTSC, PAL, and SECAM

24-hour, 2-year warranty

Analog Input

DuraVision
FDS1703 (17" / 43 cm)

1280 × 1024 resolution

BNC (composite) and D-Sub mini 15 pin inputs

Supports NTSC, PAL, and SECAM

24-hour, 2-year warranty

Diverse Monitor Range

EIZO's extensive range of monitors offers a multitude of feature sets that meet the diverse requirements of any security & surveillance environment.

Multi-Monitor Configuration

**FlexScan
EV2450** (23.8" / 60 cm)

-  Full HD (1920 × 1080) resolution
-  World's thinnest bezels at just 1 mm
-  5-year manufacturer's warranty

4K Resolution Monitor

**FlexScan
EV3285** (31.5" / 80 cm)

-  4K UHD (3840 × 2160) resolution
-  Fully flat and frameless design
-  5-year manufacturer's warranty

Touch Panel Monitors

**DuraVision
FDS1782T** (17" / 43 cm)
FDF2382WT (23" / 58 cm)

-  1280 × 1024 (17") and 1920 × 1080 (23") resolution
-  Projected capacitive (PCAP) touch technology
-  10-point multitouch with palm rejection technology
-  3-year manufacturer's warranty

**DuraVision
FDF2121WT-A** (21.5" / 54.7 cm)

-  Full HD (1920 × 1080) resolution
-  Surface acoustic wave (SAW) touch technology
-  2-point multitouch that accepts touch input from gloves
-  3-year manufacturer's warranty

Range of 15 to 31.5 Inches

EIZO offers a range of monitor sizes from 15 to 31.5 inches with resolutions of up to 4K UHD (3840 × 2160). Both touch and non-touch models are available in several sizes.

Prevent Eye Fatigue

The FlexScan EV Series monitors incorporate several features and functions that help to prevent eye fatigue including flicker-free display, brightness adjustment to as low as 1%, and blue light reduction.

Case Studies

Kantons Polizei Aargau Emergency Control Center

Switzerland

Kantons Polizei Aargau, located in Switzerland, is one of the most advanced emergency control centers in the world. They chose FlexScan ultra-slim bezel monitors for their multi-monitor workstations, running general emergency, police, fire, and ambulance departments 24/7.

Watch the video here: www.eizoglobal.com/ilkapoaargau

Port of Antwerp

Belgium

The port of Antwerp is one of the biggest in the world, situated on the river Scheldt. The highly complex logistical network of the harbor is laid out on several monitors that visualize high resolution IP cameras, maps, and flowcharts. The multi-functional FlexScan 4K monitor proved to be capable of showing all sorts of images in a very precise way while offering unequalled reliability.

Accessories

VOP-01
VESA Offset Plate

A dedicated mounting plate for attaching the DuraVision DX0211-IP decoding box to the back of VESA-supported monitors.

VESAMP100
VESA 100 Mounting Plate

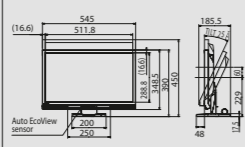

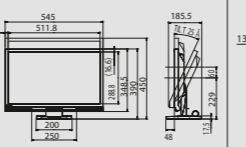

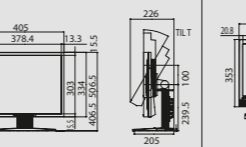

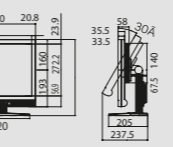

A dedicated mounting plate for attaching the DuraVision DX0211-IP decoding box to the back of certain FlexScan monitors (requires VOP-01).

DVAC-01
AC Adapter

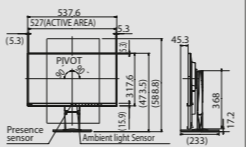

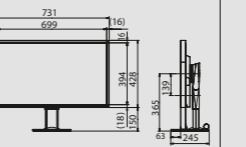

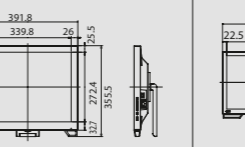

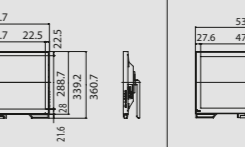

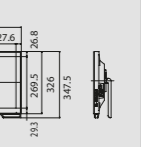

An optional AC adapter for the DuraVision DX0211-IP decoding box to be used in systems without PoE+ support.

¹ Currently supports 16 channels. Support for 64 channels planned for end of 2019. ² Axis VAPIX and Panasonic protocol support planned for end of 2019. ³ H.265 support planned for end of 2019.
⁴ Currently supports single HDMI output. Dual HDMI output support planned for end of 2019. ⁵ Performance depends on resolution and number of channels displayed. See this page for details: www.eizoglobal.com/ips
